

Main San Gabriel Basin
WATERMASTER

2023-2024

ANNUAL REPORT

**IMPROVING THE WATER SUPPLY, DEVELOPING NEW WATER SOURCES,
AND PROTECTING AND IMPROVING WATER QUALITY**

Main San Gabriel Basin Watermaster is the agency charged with administering adjudicated water rights and managing groundwater resources within the watershed and groundwater basin known as the Main San Gabriel Basin.

WATERMASTER AND ITS PARTNERS HAVE ADDED 4.2 MILLION ACRE-FEET OF WATER TO THE BASIN SINCE 1973

WATER MANAGEMENT PROGRAMS ARE PROVIDING SUSTAINABLE SUPPLIES TO MEET LONG-TERM NEEDS IN A CHANGING CLIMATE

Watermaster’s management programs have balanced the Basin by adding more than four million acre-feet of water to the Basin in the last 50 years. The Pure Water recycled water project has the potential to provide long-term water stability and balance.

TONY ZAMPIELLO LEAVES A PROUD RECORD OF ACHIEVEMENT

As I write this first annual message as Executive Officer, I look back with admiration at what Watermaster has achieved under my predecessor, Tony Zampielo.

- **The Basin Is Healthy Despite Enduring the Worst Drought Ever.** Watermaster successfully managed the Basin and ensured reliable water supplies through the recent multi-decade drought in which 18 of the past 27 years had below-average rainfall.
- **Effective Conservation Measures Are a Way of Life.** Despite that unprecedented drought, groundwater elevations have risen well into the target operating range, and water demand is holding steady at the lowest levels ever.
- **Long-Term Water Management Strategies Are Supporting Stable Water Levels in the Basin.** The Resources Development Assessment (RDA) has brought in over 196,000 acre-feet of water in the past seven years. In addition, the 10-year average for Cyclic Storage is over 133,000 acre-feet per year. These and numerous other active management measures are being added to attain long-term, sustainable water supplies.

Looking to the future, Watermaster has been working for years to develop permanent climate-resilient water sources such as the Pure Water project, which could bring up to 80,000 acre-feet of recycled water to the Basin each year. We will continue to promote and encourage conservation and support regional leaders and decision-makers by educating them about the complexities of water supply management.

Watermaster appreciates the many stakeholders and collaborators who make our shared work possible. I especially want to thank Tony Zampielo for his two decades of exceptional service. There is a more extended thank you to Tony at the end of this report. I look forward to maintaining our shared record of success in the coming years.

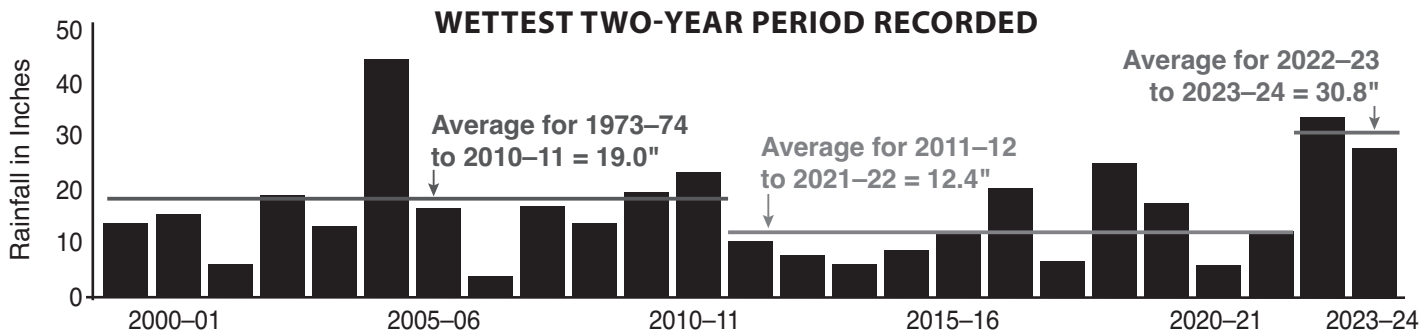

Russ Bryden,
Executive Officer

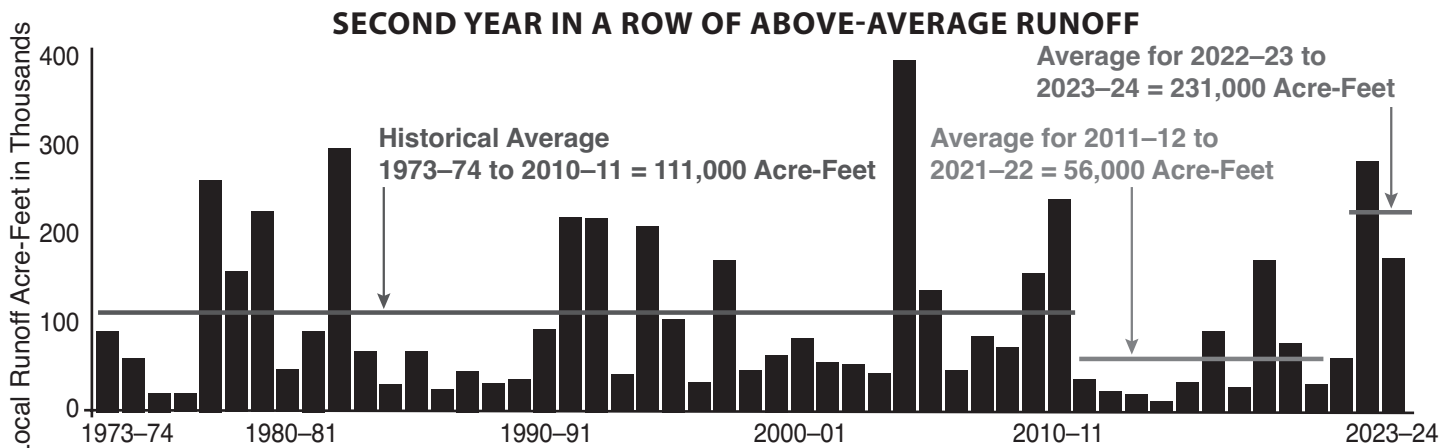

Santa Fe Spreading Grounds.

From Drought to Wettest Two Years in History

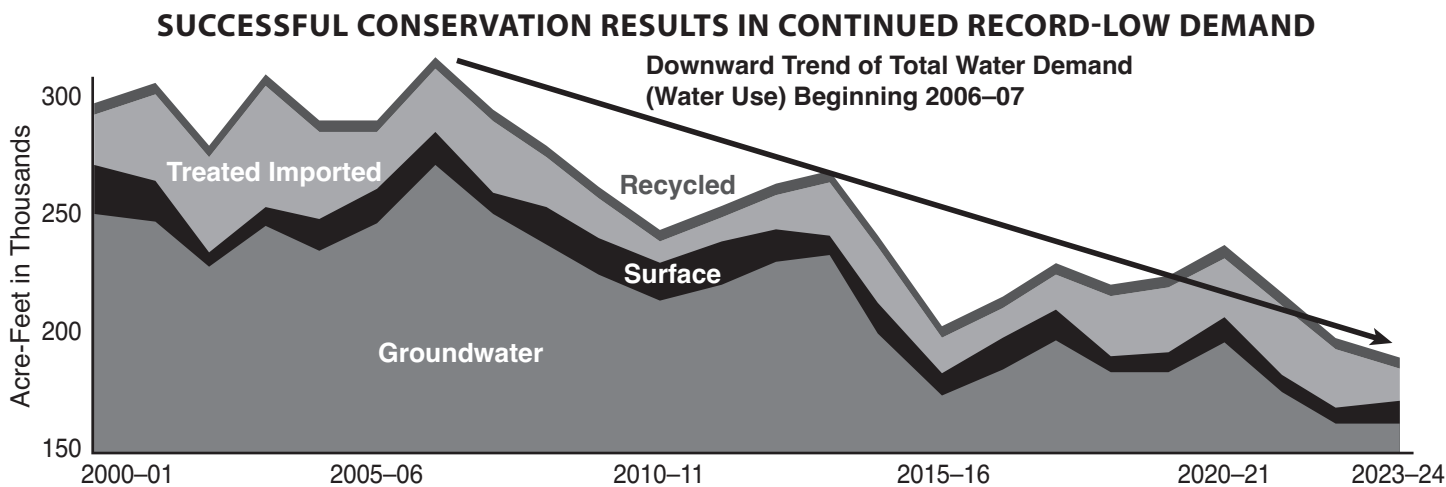

Southern California's hydrology has always been prone to swings, but as near as scientists can estimate, the period from the 2010s to the early 2020s included the driest period in the past 1,200 years. Then came 2022–2024—the wettest two-year period since records have been kept. Thanks to extensive recharge collaboration with the Los Angeles County Flood Control District, and many other management programs, the Basin is refilling and has jumped into the target operating range.

Rainfall in the San Gabriel Valley during fiscal year 2023–24 was 27.24" and the previous year's total was 34.41"—over 61" of rain in just two years.

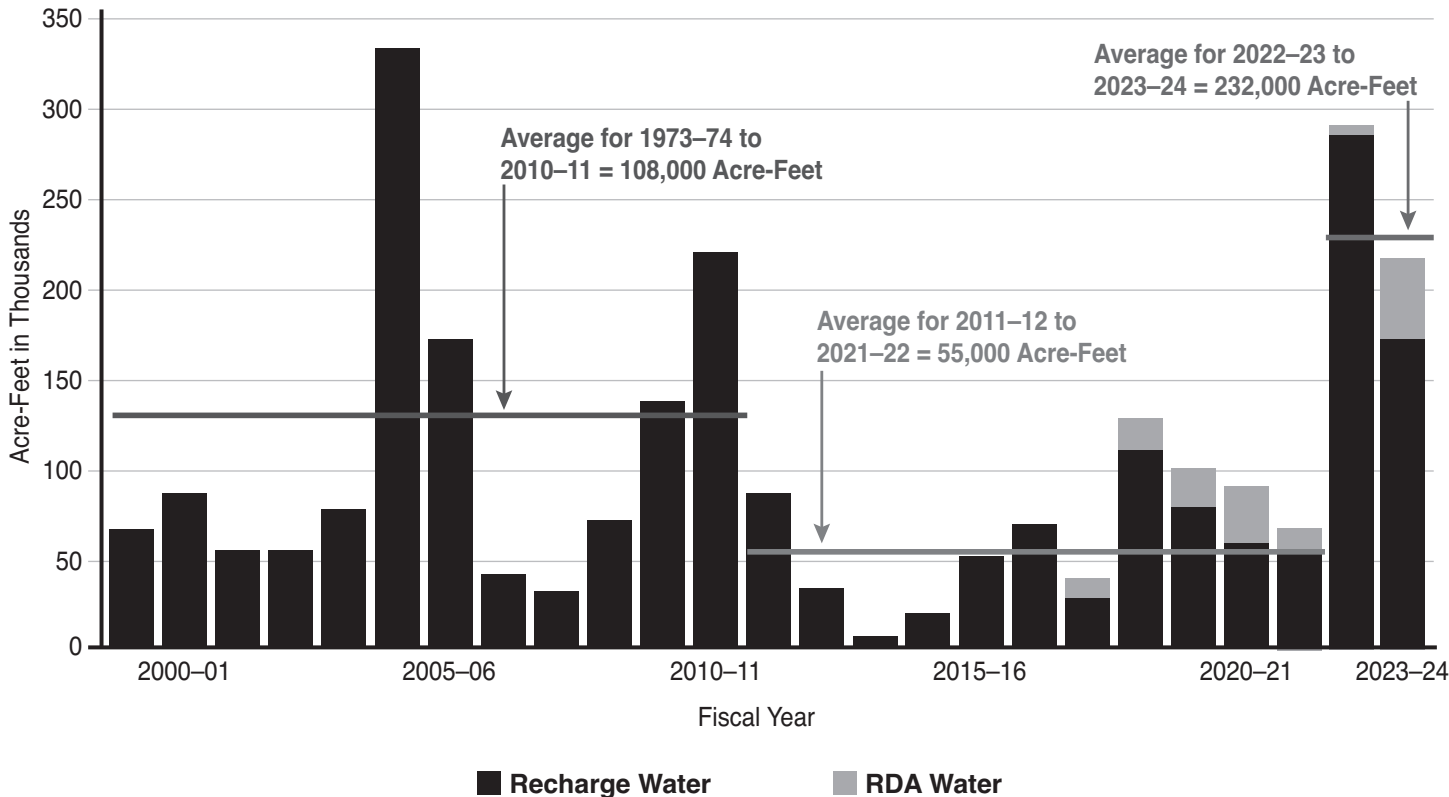

In 2023–24, annual runoff was about 175,000 acre-feet. The previous year's runoff is estimated at 286,000 acre-feet. The historical average is about 103,000 acre-feet.

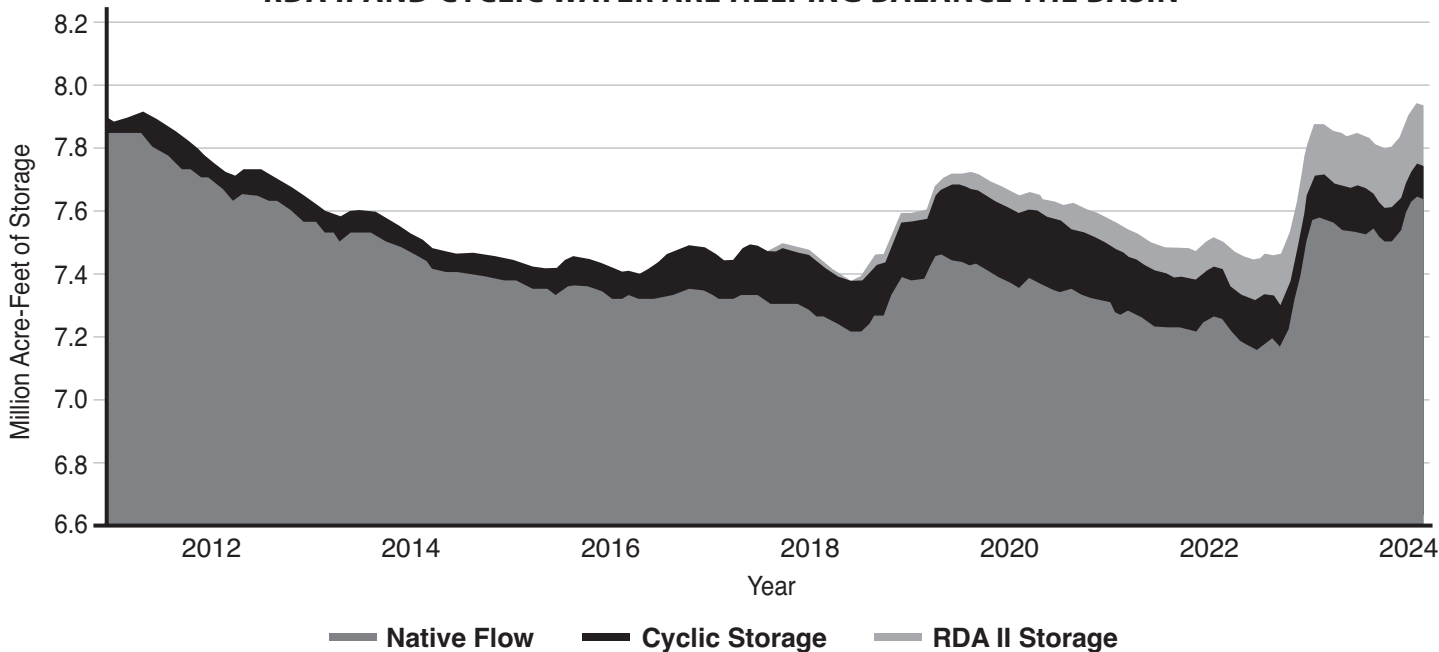

After peaking in 2006–07 at about 315,000 acre-feet, annual water demand has steadily declined over the last 17 years to about 190,000 acre-feet.

SECOND YEAR IN A ROW OF VERY HIGH LOCAL WATER RECHARGE

High rainfall in 2023-24 led to exceptional recharge for the second year in a row. The last two years averaged more than twice the long-term average runoff, and the 44,000 acre-feet of RDA water recharged set a record as well. Over the past seven years, Watermaster has recharged 149,000 acre-feet of RDA water.

RDA II AND CYCLIC WATER ARE HELPING BALANCE THE BASIN

As of June 2024 there were over 302,000 acre-feet of just RDA and Cyclic Storage in the Basin. These two sources are steadily improving Basin groundwater storage.

How Watermaster Keeps the Basin Balanced

Watermaster has proven management tools to ensure reliable long-term water supplies during droughts, flood events, and more typical years. These tools are regularly evaluated and improved, and new programs are developed as circumstances evolve.

A COMPLETE STRATEGY FOR LONG-TERM BASIN MANAGEMENT

Watermaster implements many strategies to achieve lasting equilibrium in the Basin within the Judgment provisions, with the Resource Development Assessment (RDA) and Operating Safe Yield (OSY) being the two most important management tools.

<p>KEEPING THE OSY LOW encourages conservation and ensures regular imported water purchases when supplies are available, stabilizing the groundwater supply.</p>	<p>THE RDA provides funds to purchase supplemental water to recharge the Basin, ensuring stable supplies for long-term reliability and future use.</p>
<p>CYCLIC STORAGE allows Producers to purchase and store Replacement Water before it's needed, reducing the impacts of price increases and increasing Basin reserves.</p>	<p>REVERSE CYCLIC STORAGE allows Producers to purchase supplies from the State Water Project at current prices and defer delivery to a future wet year.</p>
<p>THE IN-LIEU PROGRAM allows Producers to deliver treated water in lieu of pumped water, reducing the demand on groundwater supplies.</p>	<p>COLORADO RIVER WATER could provide a valuable source of Replenishment Water, so Watermaster is actively developing plans with the Metropolitan Water District (MWD), Responsible Agencies, and the Flood Control District to allow deliveries.</p>
<p>WATERMASTER'S GROUNDWATER MODEL provides sophisticated analysis to inform decision-making.</p>	<p>REPLACEMENT WATER SURCHARGE encourages Producers to pre-purchase water demands, reducing variability and stabilizing prices.</p>
<p>PURE WATER SOUTHERN CALIFORNIA is planned to meet long-term demand by reliably supplying the Basin with up to 80,000 acre-feet of recycled water each year.</p>	<p>STORMWATER CAPTURE and recycled urban runoff could enhance water supplies, so Watermaster is supporting studies to understand their potential and use.</p>

PROACTIVE GROUNDWATER MANAGEMENT KEEPS THE BASIN IN THE TARGET RANGE OVER TIME

1940s to 1973: The average Key Well level fell continuously due to unmanaged withdrawals.

1973: Watermaster formed.

2012 to 2024: Despite severe drought conditions in most years, Watermaster programs are boosting Key Well levels. The 2012 Judgment Amendments, RDA, supplemental water, increased conservation, and other Watermaster programs are rebuilding groundwater levels for long-term stability.

1973 to 2011: Key Well stable due to management actions. Watermaster’s collaborative water management stabilized the Key Well levels. Levels vary yearly, but the Key Well level in 2012 was about the same as in 1973.

2012 to 2015: Record-setting drought causes Key Well Levels to plummet. To address declining key well levels, Watermaster approves new management action in a major update to the Judgment.

2024 to 2030 and Beyond: Pure Water Southern California is expected to supply enough recycled water for long-term groundwater reliability and stability.

Key Tools for Balancing the Basin

Watermaster uses the Resources Development Assessment (RDA) and OSY as its primary tools for managing the Main Basin groundwater supply.

RESOURCE DEVELOPMENT ASSESSMENT (RDA) IS HELPING BALANCE THE BASIN

The Water Resource Development Assessment for the Stormwater Augmentation Program (RDA) is one of Watermaster's most important management tools. The program collects an assessment of \$175 per acre-foot from Producers to purchase untreated imported water when available and store it against future needs. The RDA is designed to allow the Basin to maintain the Baldwin Park Key Well above 180 feet of elevation through the "worst case" hydrologic conditions, which are assumed to be 15 years of sustained drought.

The RDA is a far-sighted, proactive tool that was initiated in 2015 after an internal study showed that climate change would stress local supplies, and was designed with a dual purpose:

1. to make up for the impacts of climate change and reduced runoff by providing a fund to purchase water whenever it is available to maintain levels in the Basin, and
2. to allow this same funding to be used toward regional projects like the Pure Water Southern California project when it comes online.

OPERATING SAFE YIELD INCREASED FOR FIRST TIME IN A DECADE

Each year, Watermaster sets an Operating Safe Yield (OSY) representing the amount of water that can be sustainably pumped from the Groundwater Basin without harm. Pumpers that use more than the OSY must pay a Replacement Water Assessment. Watermaster uses this to purchase imported water to replace the excess water removed by pumping.

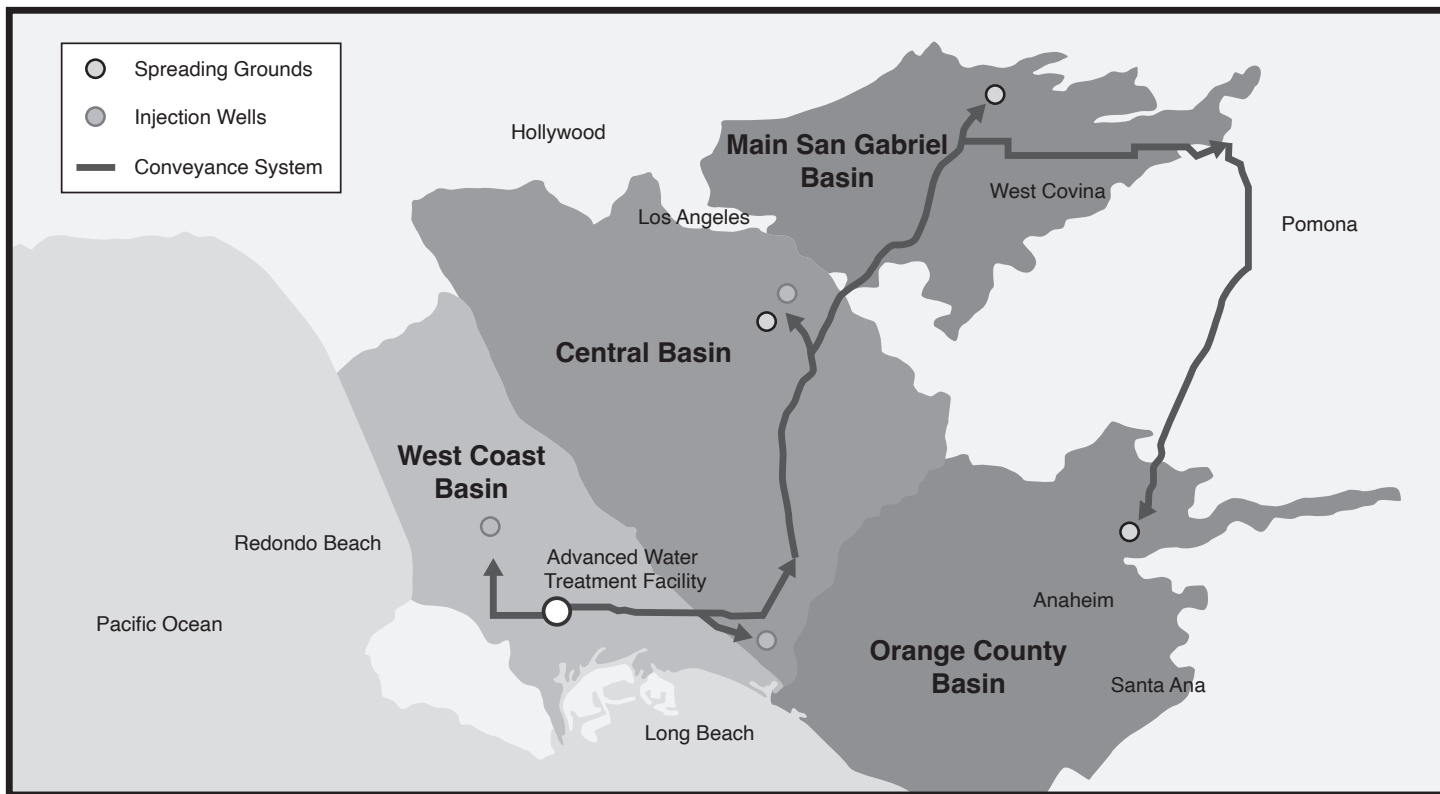

This year, Watermaster was able to increase the OSY for the first time in ten years, helping Producers and their customers by reducing the amount of Replacement Water they need to purchase. Watermaster's increased proactive measures during the recent drought, combined with the two years of heavier-than-average rainfall, contributed to this ability to safely raise the OSY to 160,000 acre-feet. This is still a relatively low level that requires the purchase of additional Replenishment Water to meet demands while helping to refill the Basin.

CONSERVATION IS HELPING KEEP DEMAND NEAR RECORD LOWS

Water demand peaked in 2006–07 at 315,000 acre-feet and has been on a long downward slope since then, reaching a record low of 190,000 acre-feet in the past two years. A key driver for decreased water use is that the Producers and Watermaster are maintaining a steady focus on promoting water efficiency and conservation.

REPLACEMENT WATER/SURCHARGE ACCOUNTING INCREASES SUPPLIES AND LOWERS COSTS

The Replacement Water/Surcharge Accounting is a \$100 assessment added to the Replacement Water Charge on overproduction. This charge is designed to encourage Producers to buy cyclic water at the Direct Rate rather than go into overproduction and incur extra charges. The resulting pre-purchases are less expensive and allow Watermaster more time to order water earlier in the year, when it is generally more available. The surcharge funds can only be used to purchase a proportionate amount of water for the specific Producer that incurred the charge.

A simplified view of the Pure Water Southern California System.

PURE WATER SOUTHERN CALIFORNIA: A KEY LONG-TERM WATER SUPPLY SOLUTION

PURE WATER IS WATERMASTER'S KEY LONG-TERM STRATEGY FOR ADDRESSING CLIMATE-RELATED CHANGES AND SECURING A LONG-TERM SUSTAINABLE WATER SUPPLY.

This year, Watermaster continued to prioritize progress on Pure Water Southern California, a joint recycled water initiative between Watermaster, Metropolitan Water District, and the Los Angeles Sanitation Districts of Los Angeles County that will add up to 80,000 acre-feet of treated water per year to the Main San Gabriel Basin.

MWD continues to advance the environmental review process, with its Board working to analyze project costs, budget impacts, and purchased water rates. With support from the MWD and Sanitary District Boards, the project has the potential to begin delivering water to the Main Basin in 10 years.

Possible Additions to the Project Could Increase Economies of Scale. Project stakeholders are exploring the possibility of adding users and treatment plants and investigating direct potable reuse of the treated water. Adding new partners and scope would spread the project benefits and costs more broadly.

A view of the Regional Recycled Water Program demonstration facility.

Key Tools for Balancing the Basin, cont.

CYCLIC STORAGE SAVES PRODUCERS MONEY AND REDUCES PRICE SWINGS

The Cyclic Storage Program allows MWD to deliver water to the Main San Gabriel Basin before Responsible Agencies and Producers need it. This flexibility allows Producers to take advantage of available water in wet years, purchasing it at lower present-day rates and then storing it for use as Replacement Water in the future (when rates may be higher due to reduced supply or other factors).

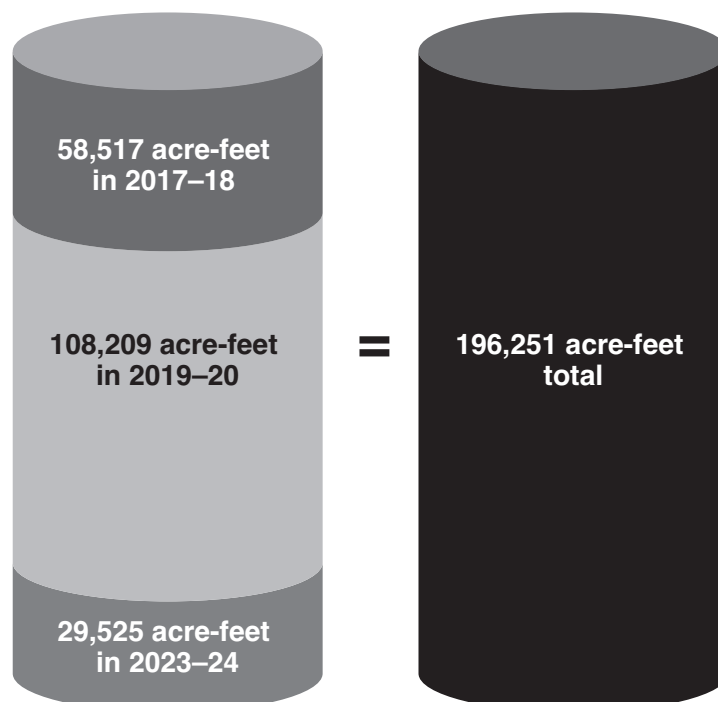

“LETTER AGREEMENTS” WITH MWD PROVIDE CREATIVE OPTIONS

Watermaster, the Responsible Agencies, and MWD have negotiated a series of creative agreements that give Producers an economic incentive to pre-purchase and deliver supplemental water into their Cyclic Storage accounts instead of paying a potentially higher Replacement Water Assessment. The terms have varied over time, but the key feature of all these agreements is the opportunity to buy water at reduced cost and either store it for later use or receive it in the future at today’s prices.

Extension Agreements for Individual Cyclic Storage Accounts. During fiscal year 2023–24, two additional MWD Letter Agreements were entered into: one with Upper San Gabriel Valley Municipal Water District (Upper District) and one with Three Valleys Municipal Water District (Three Valleys). Watermaster also approved requests from nearly 20 Producers to extend their Individual Producer Cyclic Storage Accounts for five years.

These Letter Agreements demonstrate the creativity and close collaboration between Watermaster and Metropolitan Water District and benefit everyone with improved water supplies and lower costs.

The Letter Agreements have allowed large amounts of water to be purchased and stored.

REVERSE CYCLIC PROGRAM: SECURING WATER FOR THE FUTURE AT TODAY'S LOWER RATES

The Reverse Cyclic Storage program enables MWD Member Agencies to pre-pay for water at current lower rates and take delivery from the Metropolitan Water District (MWD) up to five years later. Although the program was paused this year due to heavy rainfall, it remains a valuable tool for future drought conditions. When needed, Watermaster can use RDA funds to purchase water at today's prices, ensuring future access when it might otherwise be unavailable. This proactive approach helps secure affordable water during critical times.

THREE-YEAR PURCHASED WATER PLAN FORECASTS WATER NEEDS

Each year, Watermaster develops a three-year projection of Supplemental Water purchases from each agency. A wide range of inputs inform this projection, including the Replacement Water obligations, RDA, the In-Lieu Program, the Operating Safe Yield, and projects from the Producers. The Three-Year Purchased Water Plan is one important input in Watermaster's long-term water supply planning process.

QUAGGA MITIGATION PLAN IS NECESSARY FOR A FUTURE SEVERE DROUGHT

Quagga mussels, an invasive species whose rapid breeding can overwhelm and damage water infrastructure, pose a significant threat to water conveyance systems. The presence of these mussels in the Colorado River has historically prevented safe import of that water into the Basin.

To allow for possible future imports, Watermaster has partnered with Upper District and Los Angeles County Flood Control District on a Quagga Mussel Mitigation Plan. Although there is no immediate need to import Colorado River water, having this plan will make it easier and quicker to safely source water from the Colorado River in the future, offering another way to balance the Basin's supply and demand in a drought emergency.

PROTECTED WATER RIGHTS DURING EXPANSION OF MONUMENT

In May 2024, President Biden signed a proclamation adding 106,000 acres to the San Gabriel Mountains National Monument. The proclamation also improves residents' access to the Angeles National Forest and protects these lands from mining, development, and exploitation. Watermaster has closely engaged with this process and local legislators to ensure that groundwater rights and supply are protected under these changes.

Proactively Protecting Water Quality

Watermaster is entrusted with managing water quality in the Basin as mandated by the Judgment. By closely monitoring the evolving regulatory landscape, Watermaster ensures full compliance with existing standards while proactively addressing future regulations through rigorous, forward-thinking testing protocols.

MONITOR AND PREPARE FOR WATER QUALITY REGULATIONS

Watermaster continues to monitor Division of Drinking Water (DDW) regulations and proposed compliance standards related to PFAS and other substances. Thanks to proactive testing and monitoring, Watermaster and the Producers are well equipped to maintain water quality and confidently comply with any new state or federal regulations.

PROACTIVELY GOING BEYOND PFAS REQUIREMENTS TO PROTECT WATER QUALITY

PFAS, Per- and Polyfluoroalkyl Substances, Are a Group of Thousands of Chemicals That Are Widely Used in Consumer and Industrial Products. PFAS readily leach from soil, migrate in groundwater, persist in the environment, and bioaccumulate. There are potentially tens of thousands of PFAS-impacted sites in the United States, and the impacts on health are still poorly understood.

Watermaster Got Ahead of Regulations with Basinwide Testing. In April 2022, Watermaster authorized its staff to conduct a baseline sampling and testing of all active wells in the Main Basin (excluding those wells under a DDW Monitoring Order) for PFAS. The goal was to characterize PFAS in the Basin and take advantage of economies of scale.

Watermaster staff completed the one-time baseline PFAS sampling of wells that were not previously included in the monitoring required by the DDW Monitoring Orders, except for wells that are not available for sample collection.

A review of the available results indicates many wells in the Main Basin have PFOA and PFOS results above the EPA proposed MCLs. Some of these wells may already have DDW-approved treatment, blend plans in place, or have existing granular activated carbon treatment for other non-PFAS contaminants.

PREPARED FOR HEXAVALENT CHROMIUM REGULATIONS

The State Water Board adopted the Hexavalent Chromium MCL Regulation with an effective date of October 1, 2024. Watermaster has done preliminary work anticipating compliance schedules, notification standards, and the status of the Main Basin. Most water sources already meet sampling requirements and no significant increase in testing cost is expected.

ACTIONS TO PROTECT AND ENHANCE WATER QUALITY

WHITTIER NARROWS PRODUCTION AGREEMENT EXTENDED

Watermaster negotiated a yearlong extension of the production agreement with the Los Angeles County Department of Parks and Recreation and the Department of Toxic Substances Control to continue delivering treated water to Legg Lake from Whittier Narrows Operable Unit. This is part of Watermaster’s commitment to beneficially using all treated groundwater.

SECTION 28 WELL MODIFICATION REVIEWS PRESERVE WATER QUALITY AND SUPPLY

Any action to drill, destroy, or modify a well is reviewed and approved by Watermaster in advance to ensure that water quality and supplies are not harmed. During fiscal year 2023–24, Watermaster reviewed seven Section 28 permit applications.

ANNUAL LANDFILL INSPECTIONS PROTECT GROUNDWATER QUALITY

Watermaster staff conducted its annual inspections of local landfills and found that each landfill appeared to operate consistent with the conditions under each landfill’s regulatory permit.

PROACTIVE WATER QUALITY TESTING SUPPORTS EFFECTIVE MANAGEMENT

Each year, Watermaster conducts comprehensive water quality testing across the entire Basin on behalf of the Producers. This Basinwide approach ensures consistent responses to regulatory inquiries, provides a holistic view of water quality that boosts confidence, and delivers uniform data to enhance the accuracy and reliability of the groundwater management model.

SUPPORT OPERABLE UNIT CLEANUPS

Expert Management of the BPOU Cleanup Agreement. Watermaster oversees the implementation of the Baldwin Park Operable Unit (BPOU) Agreement, the largest cleanup effort in the Basin. Each year, Watermaster provides third-party review and evaluation of the cleanup process, offers accounting services, and coordinates technical and administrative efforts for subproject committee meetings.

Facilitation and Collaboration on Basinwide Cleanups. Watermaster collaborates with stakeholders and regulatory agencies across the Basin to facilitate operable unit cleanups, ensuring compliance with regulatory standards along with requirements under the Judgment, with technical assistance as needed.

COMPREHENSIVE FIVE-YEAR WATER QUALITY AND SUPPLY PLAN UPDATED

Watermaster performed its annual update of the comprehensive Five-Year Plan, which outlines the current status of water supply and quality, forecasts potential changes, and details strategies to maintain and enhance both water quality and supply.

Collaboration and Engagement

Continuous outreach and communication programs ensure that stakeholders, water users, and the public know about the Basin we share and how we maintain reliable, high-quality water supplies.

OUTREACH AND EDUCATION FOR ACCURATE, UNIFIED MESSAGING

THE “WATERS THAT CONNECT US” CAMPAIGN BUILDS WATER AWARENESS

The multiyear “Waters That Connect Us” campaign continued in 2023–24 with regular social media posts, informative video clips, and other outreach activities. This initiative builds public awareness of water issues in the Basin, shares accurate information about Basin water supplies, and encourages the public to conserve and protect the #WatersThatConnectUs.

UPPER DISTRICT’S WATERFEST 2024 HELPS INFORM THE PUBLIC

In May, Watermaster staff operated an information booth at Waterfest 2024, where they provided resources to educate the public about the Basin and how groundwater fits into local water suppliers’ responsibilities.

WATERMASTER 101 WORKSHOPS LAY GROUNDWORK FOR BASIN OPERATIONS

Watermaster 101 workshops give stakeholders vital background and details about Watermaster and about Basin operation and management. This year, Watermaster 101s focused on the Resources Development Assessment (RDA) and how it supports long-term responsible Basin management.

COLLABORATING AND ENGAGING LOCALLY, REGIONALLY, AND STATEWIDE

ONGOING ENGAGEMENT WITH REGIONAL AND STATE AGENCIES

Watermaster actively partners with a wide range of regional agencies and water management groups for crucial activities such as Quagga Mussel Mitigation planning, ACWA Region 8 legislative planning meetings, and groundwater replenishment coordination, including:

- California Groundwater Coalition
- Central Basin Water Association
- Greater LA County Integrated Regional Water Management
- LA County Public Works/Flood Control District
- LA County Safe Clean Water Program Watershed Area Steering Committees

- Metropolitan Water District of Southern California
- San Gabriel Valley Council of Governments
- San Gabriel Valley Municipal Water District
- San Gabriel Valley Protective Association
- San Gabriel Valley Water Association
- Three Valleys Municipal Water District
- Upper San Gabriel Valley Municipal Water District

SUPPORTING AREA AGENCIES WITH CONTRACT MANAGEMENT AND ADMINISTRATION

Six Agencies Rely on Watermaster to Serve as Their Contract Manager and Administrator. This ongoing collaboration, which includes sharing staff, allows all parties to benefit from economies of scale and deepens Watermaster’s relationship with key partners in the Basin and across the region.

WATERMASTER MODEL SUPPORTS INFORMED BASIN MANAGEMENT

Watermaster's advanced 3D groundwater model continues to aid Basin monitoring and management activities. Last year it supported planning by the Puente Valley Operable Unit (PVOU), as well as several Section 28 applications. This year, PVOU used the model to design tests of their groundwater treatment program.

COLLABORATION ON HABITAT CONSERVATION INITIATIVE TO PROTECT WATER SUPPLIES

Watermaster coordinates with the Los Angeles County Flood Control District and other organizations to address the impacts of critical habitat designations that affect the San Gabriel River, which provides about 80% of the local water supply to the Main Basin. This year, the US Fish and Wildlife Service intends to relocate some Santa Ana Sucker fish from the Santa Ana River to the San Gabriel River. Watermaster is actively engaged in preventing negative impacts on critical water supplies between Morris and Santa Fe Dams.

WATERMASTER, PARTNERS ADOPT COUNTY PLAN FOR RELIABLE LONG-TERM WATER SUPPLIES

The Los Angeles County Water Plan (CWP) was developed by the Department of Public Works in partnership with Watermaster and other agencies, such as local tribes, and other regional stakeholders. The plan provides a framework for collaborative management of Los Angeles County water resources. The CWP was unanimously adopted by the Los Angeles County Board of Supervisors on December 5, 2023, and Watermaster adopted a resolution supporting the plan on July 3, 2024. Watermaster will be an ongoing adviser and active partner in the CWP and any resulting initiatives, working closely with the Department of Public Works and other regional stakeholders and communities.

WATERMASTER MEETS WITH PRESIDING JUDGE MAUREEN DUFFY-LEWIS

Watermaster staff attended Status Conference Hearings in September and April before the Honorable Maureen Duffy-Lewis, who presides over the Judgment, to update her on Basin conditions.

COLLABORATING TO DECREASE IMPACT OF READINESS TO SERVE CHARGE

Watermaster's many creative water management programs have increased the amount of water purchased from MWD in recent years, leading in turn to very large increases in MWD's Readiness to Serve charges. This has raised costs for the Upper District and Three Valleys. Watermaster has joined them in seeking solutions to these extreme charges.

Focus on Efficiency and Effectiveness

Watermaster is always focused on providing excellent service and effectively managing the Basin for all stakeholders.

BUDGET AND ASSESSMENTS

In May, Watermaster adopted the FY 2024–25 administration budget of \$5.4 million and adjusted assessments to account for changes in production and administrative expenses in recent years.

The Administration Assessment Was Increased \$3, to \$21/acre-foot, on all FY 2023–24 production. This modest increase addresses shortfalls caused by lower production in recent wet years and will fund the succession transition for two key positions.

In-Lieu Assessment Was Reduced \$3, to \$5/acre-foot, on all production in FY 2023–24. This is the first reduction of the In-Lieu Assessment in several years.

The Resource Development Assessment (RDA) Remains Unchanged at \$175/acre-foot for production in FY 2024–25. The RDA II has held steady at this level since FY 2021–22. RDA funds will allow the purchase of supplemental water for use when dry conditions return.

Replacement Water Assessments Increased by Varying Amounts. These assessments are required by the Judgment when a Producer pumps beyond their annual production right. Each responsible agency adopts a replacement water rate every year.

REBALANCING THE LOWER AREA CREDIT

Groundwater from the Main San Gabriel Basin naturally flows through Whittier Narrows into the Central Basin, also known as the Lower Area. The 1965 Long Beach Judgment that governs this water requires that the Lower Area receive 50% of the usable water from the watershed that feeds both basins.

The San Gabriel River Watermaster monitors and accounts for this flow. Based on their calculations, the Lower Area has run a credit balance of water received since the mid-1990s. In total, the Lower Area has received 395,572 acre-feet more than its required share.

Recent wet years and higher flows have significantly increased the water credit to the Lower Area, which would typically mean a corresponding decrease in water releases from the Upper Area's San Gabriel Canyon reservoirs. If drought conditions return over the next few years, balancing the credit through reduced releases is being considered.

Watermaster, San Gabriel River Watermaster, and the San Gabriel Valley Protective Association Are Discussing Ways to Manage This Excess and balance the credit, given the uncertainties created by increasingly extreme variations in hydrologic conditions. Additionally, Watermaster maintains a Make-Up Water Fund to meet any future Replacement Water obligations should the balance shift.

Watermaster remains committed to fulfilling its responsibilities and collaborating with regional agencies to ensure fair and effective management of local water resources.

EFFICIENT AND EFFECTIVE ADMINISTRATION, OPERATION, AND FINANCE

RECOGNIZED FOR LOW INSURANCE LOSS RATIO

Watermaster Recognized for Commitment to Excellence in Loss Reduction. The Association of California Water Agencies/Joint Powers Insurance Authority (ACWA/JPIA) honored Watermaster for its commitment to excellence in insurance claims reduction. Watermaster was recognized for a loss ratio (losses divided by premiums) of 20% or less for Medical, Worker’s Compensation, and Liability/Property Programs.

WATERMASTER RECEIVES A CLEAN AUDIT REPORT FOR FY 2023–24

This April, Watermaster received and filed a clean audit report with an unmodified opinion from an independent auditor, ensuring the highest quality and accuracy in financial reporting. This audit reflects Watermaster’s ongoing commitment to efficient operations and effective financial stewardship.

HONORING SERVICE TO OUR COMMUNITY AND REGION

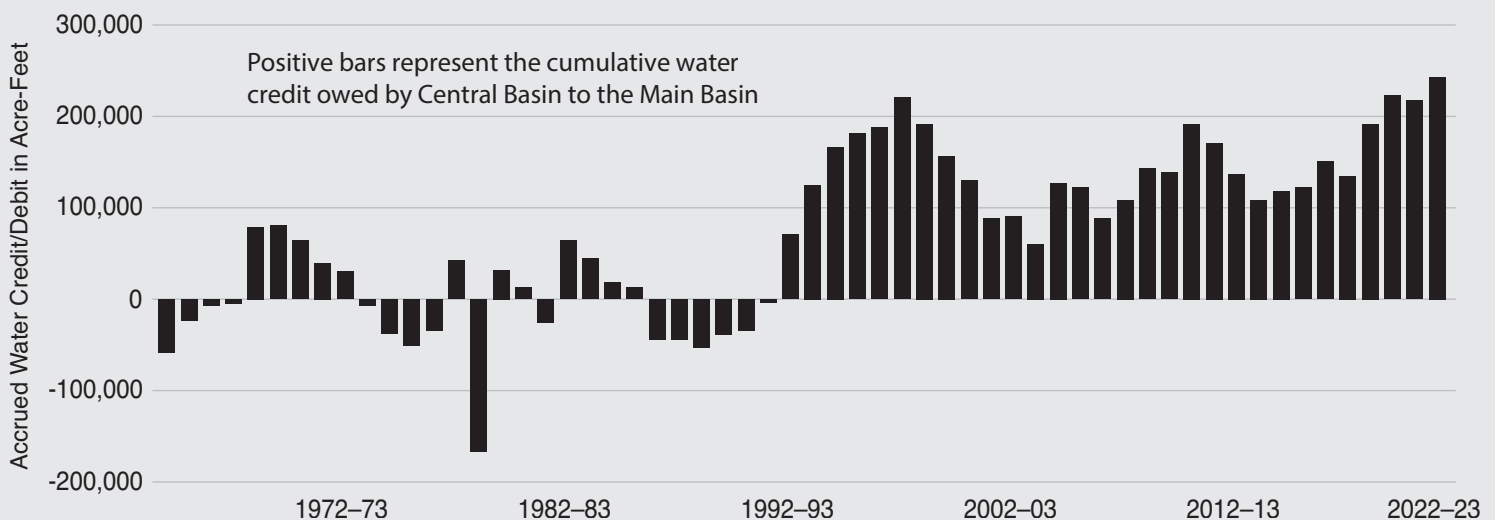

THANK YOU, DAVID DE JESUS!

In January, Watermaster issued a resolution recognizing David De Jesus for his outstanding contributions and services to Watermaster during his tenure as a Board Member and Producer Member from 2016 to 2023.

CONGRESSWOMAN GRACE NAPOLITANO HONORED FOR EXCEPTIONAL SERVICE

Congresswoman Grace Napolitano (D-CA-31), who will retire at the end of this Congressional term, has steadfastly advocated for sustainable water policy in the San Gabriel Valley and Southern California throughout her career. To recognize her contributions, the San Gabriel Valley Water Association honored the congresswoman at a quarterly meeting this year. Watermaster would like to thank Congresswoman Napolitano for her dedication and commitment to maintaining a safe, reliable water supply for the San Gabriel Valley!

The Large Accumulated Debt Owed by the Central Basin to the Main Basin

Thank You Tony Zampielo, Welcome Russ Bryden

TONY ZAMPIELLO: 20 YEARS OF EXCEPTIONAL SERVICE

Mr. Zampielo Leaves Behind an Impressive Record of Service to Watermaster and the Region. During his tenure as a committed water industry leader, the Main Basin and Producers have benefited from his knowledge, experience in the community, and intuitive understanding of the historical richness of the region.

Modernized Water Management Programs. Mr. Zampielo played a pivotal role in the development of amendments to the Judgment. His contributions include provisions creating funding programs to facilitate increased recharge and groundwater storage: the Water Resources Development Assessment, Storage and Export Agreements, and the Three-Year Purchased Water Plan.

Service to Many Water Organizations and Communities. Mr. Zampielo served in numerous roles, including Executive Officer of the Raymond Basin Management Board, President of the Association of Ground Water Agencies, Executive Secretary for the San Gabriel Valley and Central Basin Water Associations, and Secretary/Treasurer for the San Gabriel Valley Protective Association and California Groundwater Coalition. He also represented Watermaster and the Basin community on many stakeholder and advisory committees statewide.

Watermaster appreciates and thanks Mr. Zampielo for his years of service and wishes him a happy and fulfilling retirement.

Mr. Zampielo successfully steered Watermaster through many challenges, including unprecedented droughts and strained water supplies statewide.

WELCOME RUSS BRYDEN

Watermaster welcomed Russ Bryden as the new Executive Officer in April 2024. Mr. Bryden brings more than 25 years of experience as a collaborative leader with a strong background in engineering, water system management, and public policy.

Both his technical expertise and his experience as a director of the Antelope Valley Watermaster will support Watermaster's goal of enforcing the provisions of the Judgment that established water rights and its responsibility for efficient management of the Basin's groundwater.

Russ has big shoes to fill, and he has been filling them well. In his first six months, Russ has demonstrated tremendous leadership and engaged collaboratively with Watermaster's many Producers and regional stakeholders.

Tony Zampielo (left) with Russ Bryden.

APPENDIX A

SUMMARY OF WATERMASTER ACTIONS
FISCAL YEAR 2023-2024

APPENDIX A

CHRONOLOGICAL SUMMARY OF WATERMASTER ACTIONS FISCAL YEAR 2023-24

Cyclic Storage

On November 1, 2023, Watermaster authorized the extension agreement for Valencia Heights Water Company/Watermaster Cyclic Storage Agreement for a period of five years, to expire December 5, 2028.

On November 1, 2023, Watermaster authorized the Executive Officer to execute the renewal of Three Valleys Municipal Water District Cyclic Storage Agreement upon final amendment language.

On December 6, 2023, Watermaster authorized the purchase of 3,023 acre-feet of cyclic storage water from Upper San Gabriel Valley Municipal Water District (Upper District) for the City of Arcadia's individual Producer cyclic storage account.

On December 6, 2023, Watermaster authorized the extension agreement for City of Alhambra/Watermaster Cyclic Storage Agreement for a period of five years, to expire December 2028.

On December 6, 2023, Watermaster authorized the extension agreement for the City of Arcadia/Watermaster Cyclic Storage Agreement for a period of five years, to expire December 2028.

On December 6, 2023, Watermaster authorized the extension agreement for the City of Azusa/Watermaster Cyclic Storage Agreement for a period of five years, to expire in December 2028.

On December 6, 2023, Watermaster authorized the extension agreement for California American Water – Duarte System/Watermaster Cyclic Storage Agreement for a period of five years, to expire December, 2028.

On December 6, 2023, Watermaster authorized the extension agreement for California American Water – San Marino System/Watermaster Cyclic Storage Agreement for a period of five years, to expire December, 2028.

On December 6, 2023, Watermaster authorized the extension agreement for California Domestic Water Company/Watermaster Cyclic Storage Agreement for a period of five years, to expire December 2028.

On December 6, 2023, Watermaster authorized the extension agreement for Covina Irrigating Company/Watermaster Cyclic Storage Agreement for a period of five years, to expire in December 2028.

On December 6, 2023, Watermaster authorized the extension agreement for the City of Glendora/Watermaster Cyclic Storage Agreement for a period of five years, to expire in December 2028.

On December 6, 2023, Watermaster authorized the extension agreement for the Golden State Water Company – San Gabriel/Watermaster Cyclic Storage Agreement for a period of five years, to expire December, 2028.

On December 6, 2023, Watermaster authorized the extension agreement for the Golden State Water Company – San Dimas/Watermaster Cyclic Storage Agreement for a period of five years, to expire December, 2028.

On December 6, 2023, Watermaster authorized the extension agreement for La Puente Valley County Water District/Watermaster Cyclic Storage Agreement for a period of five years, to expire December, 2028.

On December 6, 2023, Watermaster authorized the extension agreement for the City of Monrovia/Watermaster Cyclic Storage Agreement for a period of five years, to expire December 2028.

On December 6, 2023, Watermaster authorized the extension agreement for the City of Monterey Park/Watermaster Cyclic Storage Agreement for a period of five years, to expire December 2028.

On December 6, 2023, Watermaster authorized the extension agreement for the San Gabriel County Water District/Watermaster Cyclic Storage Agreement for a period of five years, to expire in December 2028.

On December 6, 2023, Watermaster authorized the extension agreement for Suburban Water Systems/Watermaster Cyclic Storage Agreement for a period of five years, to expire in December 2028.

On December 6, 2023, Watermaster authorized the extension agreement for Sunny Slope Water Company/Watermaster Cyclic Storage Agreement for a period of five years, to expire in December 2028.

On May 1, 2024, Watermaster authorized the extension agreement for United Rock Products Corporation/Watermaster Cyclic Storage Agreement for a period of five years, to expire May 1, 2029.

On June 5, 2024, Watermaster authorized the extension agreement for Valley County Water District/Watermaster Cyclic Storage Agreement for a period of five years, to expire June 5, 2029.

On June 5, 2024, Watermaster authorized the purchase of 250 acre-feet of cyclic storage water from Upper District for United Rock Product Corporation's individual Producer cyclic storage account.

On July 3, 2024, Watermaster authorized the Executive Officer to sign the Metropolitan Water District of Southern California letter agreement regarding a schedule for payment of cyclic water pre-delivered in calendar year 2024.

Resolution Adopting Governmental Executive Retirement Plan

On July 5, 2023, Watermaster approved Resolution No. 07-23-317, thereby adopting the Governmental Executive Retirement Plan.

Agreement Extensions

On July 5, 2023, Watermaster signed a six-month extension of the production agreement with the Los Angeles Department of Parks and Recreation and the Department of Toxic Substance Control relative to the Whittier Narrows Operable Unit.

On December 23, 2023, Watermaster signed the second extension of the water production agreement with the Los Angeles Department of Parks and Recreation and the Department of Toxic Substance Control relative to the Whittier Narrows Operable Unit.

On April 3, 2024, Watermaster authorized the extension renewal of Golden Meters Agreement for two years.

On June 5, 2024, Watermaster authorized the third extension of the Water Production Agreement with the Los Angeles County Department of Parks and Recreation and the Department of Toxic Substances Control relative to the Whittier Narrows Operable Unit (WNOU).

Three-Year Purchased Water Plan

On October 4, 2023, Watermaster received and filed the Three-year Purchased Water Plan as presented.

Audit Report

On October 4, 2023, Watermaster received and filed the audit report as presented by Clifton Larson Allen.

Cash Investment Policy

On October 4, 2023, Watermaster reaffirmed its Cash Investment Policy.

Election of Producer Nominees for Watermaster for Calendar Year 2023

On November 1, 2023, Watermaster held its annual election of Producer nominees. Producers elected Melissa Barbosa, Benjamin Lewis, Jr., David Michalko, Lynda Noriega, Anteneh Tesfaye and Martin Zvirbulis. The Court subsequently approved these nominations.

Election of Public Representative for Watermaster

On November 1, 2023, Watermaster approved San Gabriel Valley Municipal Water District's (SGVMWD's) nomination of Steven T. Placido for its Public Representative for Watermaster for calendar year 2024.

On November 1, 2023, Watermaster approved Upper District's nominations of Dr. Anthony Fellow and Jennifer Santana for its Public Representatives for Watermaster for calendar year 2024.

Annual Report Completed

On November 1, 2023, in accordance with Section 36 of the Judgment, Watermaster received the Annual Report and filed it with the Court and Parties.

Resource Development Assessment (RDA)

On November 1, 2023, the Executive Officer reported that in fiscal year 2022-23 Watermaster collected funds from the RDA for Storm Water Augmentation Program (RDA II), for a total of \$29,361,195.50. Watermaster authorized the Executive Officer to make the appropriate purchases for reliability storage water supply. The estimated requirement for delivery during fiscal year 2023-24 is a total RDA delivery of 31,528 acre-feet.

Replacement Water

On November 1, 2023, Watermaster authorized the purchase of Replacement Water from the appropriate Responsible Agencies for overproduction from the Basin during fiscal year 2022-23.

Certificate and Resolution of Appreciation

On December 6, 2023, Watermaster received and adopted Resolution No. 12-23-318, expressing appreciation, commemorating, and inviting public attention to the outstanding services rendered by David De Jesus during his tenure as a Board Member and Producer member of Watermaster.

Five-Year Plan

Following a public hearing on January 3, 2024, Watermaster adopted the Draft Five-Year Water Quality and Supply Plan (Five-Year Plan), which was received by Watermaster on November 1, 2023.

Replacement Water/Surcharge Accounting

On January 3, 2024, Watermaster received and filed the Replacement Water/Surcharge Accounting. Watermaster readjusted the appropriate Producer production rights for fiscal year 2023-24 and requested TVMWD to deliver 21.8 acre-feet of water at the 2023 rate of \$855.00 per acre-foot from its cyclic storage account or transfer from the water pre-delivered during calendar year 2023, and Upper District to deliver 22.30 acre-feet of water at the 2023 rate of \$958.00 per acre-foot from its cyclic storage account or transferred from the cyclic water pre-delivered as part of the 2020 letter agreement.

Watermaster Retirement Plan

On April 3, 2023, Watermaster adopted Resolution No. 04-24-319, Governmental Executive Retirement Plan.

Administration Budget

On May 1, 2024, Watermaster received and filed the Preliminary Draft Administration Budget for FY 2024-25 and Assessments for FY 2024-25 production.

Watermaster Assessments and Administration Budget

On May 1, 2024, Watermaster approved Resolution No. 05-24-320, thereby adopting the Administration Budget for fiscal year 2024-25 in the amount of \$5,461,486.00. The Administration Assessment was set at \$21.00 per acre-foot, the In-Lieu Assessment was set at \$5.00 per acre-foot, and the Water RDA was set at \$175 per acre-foot on fiscal year 2023-24 Production. The Replacement Water Assessment for fiscal year 2023-24 and fiscal year 2024-25 was set at \$240.00 and \$260.00 per acre-foot, respectively, for excess production within SGVMWD; at \$1,003.00 and \$1,012.00 per acre-foot, respectively, for excess production within TVMWD; and at \$1,106.00 and \$1,115.00 per acre-foot, respectively, for excess production within Upper District.

Operating Safe Yield

On May 1, 2024, Watermaster conducted a public hearing and approved Resolution No. 05-25-321 establishing the Operating Safe Yield at 160,000 acre-feet for fiscal year 2024-25, 140,000 acre-feet for fiscal year 2025-26, 140,000 acre-feet for fiscal year 2026-27, 140,000 acre-feet for fiscal year 2027-28, and 140,000 acre-feet for fiscal year 2028-29.

Contract Renewal

On June 5, 2024, Watermaster authorized a renewal for two a two-year term extension of the existing Title 22 and Baldwin Park Operable Unit (BPOU) Laboratory Contract with Weck Laboratories.

Los Angeles County Water Plan

On July 3, 2024, Watermaster adopted and passed Resolution No. 07-24-322 in Support of the Los Angeles County Water Plan.

Outside Activities: Watermaster Presented, Organized, Facilitated, Attended, Etc.

Thursday, July 6, 2023, met with representatives from an Asian media outlet. We discussed drought, recovery, water quality, outreach, and messaging.

On Monday, July 10, participated in the San Gabriel District Board meeting. Items of discussion included their budget approval, COLA, and an update on their pipeline repair project.

On July 11, 2023, attended the Upper District Finance and Admin Committee meeting that discussed their financial overview, COLA, water sales, and reserve policy.

On July 11, 2023, attended Upper District's Water Resources and Facilities Planning Committee meeting where they discussed the status of the building improvements, i.e., Elevator and final touch-ups. They also discussed the Metropolitan Water District of Southern California's (MWD's) new Climate Action Master Plan – CAMP4W.

On July 12, 2023, attended the Upper District Producer meeting, where the group discussed water supply conditions, MWD cyclic deliveries, and water sales.

On July 12, 2023, attended the Upper District Board Meeting as well, recapping information provided at the Producer meeting.

July 19, 2023, invited by MWD to attend the grant award ceremony for the Pure Water Southern California project. The state awarded the project \$80 million to advance the project.

On July 25, 2023, participated in the Groundwater Replenishment Coordinating Group meeting with representatives from Los Angeles County, MWD, Water Replenishment District of Southern California (WRD), Army Corps, and other stakeholders along the San Gabriel River. Discussed planned projects, coordination of deliveries, and stormwater capture totals.

On July 25, 2023, participated in the MWD Bay Delta Conveyance meeting. They gave an overview of the challenges and proposed projects to enhance long-term resiliency of the system.

On July 26, 2023, participated in the Greater Los Angeles County Integrated Regional Water Management Plan (GLAC IRWMP) Leadership Committee meeting. An update on existing grant awards was provided, along with information regarding the County's LA Water Plan.

On July 26, 2023, conducted two field inspections relative to production questions – LA County Parks, Santa Fe Dam, and Southern California Edison, Live Oak Substation.

On Thursday, July 27, 2023, attended a portion of the San Gabriel Mountain Community Collaborative meeting and received an update on forest staffing and legislative priorities.

On August 1, 2023, participated in the MWD Groundwater/Reservoir Water Management Workshop on storage and in-lieu opportunities.

On August 15, 2023, attended the LA County Safe Clean Water Program, Rio Hondo Watershed Area Steering Committee (WASC) meeting.

On August 24, 2023, participated in the MWD San Gabriel Valley Water Executives meeting focused on the status of the Pure Water Project and supply conditions.

On August 24, 2023, participated in the Upper San Gabriel River WASC as part of LA County's Safe Clean Water Program.

On August 30, 2023, invited to participate in a local briefing with Congresswoman Grace Napolitano and representatives from Jet Propulsion Laboratory (JPL) on their extensive aquifer recharge and earth studies.

On August 30, 2023, met with representatives from the University of Southern California (USC) Cross Connection Program to discuss possible automation upgrades at some of the well sites utilized for the San Gabriel Valley Protective Association (SGVPA) monitoring program.

On August 31, 2023, attended a Three Valleys Master Plan Workshop.

On August 1, 2023, participated in the MWD Groundwater/Reservoir Water Management Workshop on storage and in-lieu opportunities.

On August 15, 2023, attended the LA County Safe Clean Water Program, Rio Hondo WASC meeting.

On August 24, 2023, participated in the MWD San Gabriel Valley Water Executives meeting focused on the status of the Pure Water Project and supply conditions.

On August 24, 2023, participated in the Upper San Gabriel River WASC as part of LA County's Safe Clean Water Program.

On August 30, 2023, invited to participate in a local briefing with Congresswoman Grace Napolitano and representatives from JPL on their extensive aquifer recharge and earth studies.

On August 30, 2023, met with representatives from the USC Cross Connection Program to discuss possible automation upgrades at some of the well sites utilized for the SGVPA monitoring program.

On August 31, 2023, attended a Three Valleys Master Plan Workshop.

On October 3, 2023, participated in the Council of Governments (COG) Water Committee.

On October 3, 2023, attended MWD's Member Agency Groundwater Meeting discussing available supply and incentive programs.

On October 4, 2023, attended the Three Valleys Municipal Water District Board Meeting where their financial audit was discussed.

On October 4, 2023, attended Upper District's Water Resources and Facilities Planning Committee meeting where they discussed MWD water supplies, spreading activities, and an update on the closure of the building remodel contract.

On October 10, 17 and 24, 2023, attended Upper District's spreading coordination meetings with MWD and LA County representatives. The group is discussing planned deliveries and adjustments needed to allow for routine maintenance at Santa Fe Dam and Spreading Grounds.

On October 12, 2023, attended the West Fork Work Group meeting with representatives from Los Angeles County Flood Control District, Forestry Service, and Fish & Wildlife to discuss canyon flows and coordination.

On October 19, 2023, attended the Southern California Water Utilities Association Vendors Fair at Irwindale Speedway.

On October 24, 2023, participated in a meeting with Three Valleys representatives to discuss cyclic storage opportunities with MWD and Watermaster's process for extending the existing agreement.

On October 26, 2023, attended the Three Valleys Leadership Breakfast, featuring an update from MWD on the status of the State Water Project and Bay Delta planning programs.

On November 1, 2023, attended the Three Valleys Board Meeting.

On November 2, 2023, invited to participate in the MWD Ceremony renaming the Pure Water Southern California project in honor of Congresswoman Grace Napolitano.

On November 2, 2023, attended the Southern California Water Coalition's Annual Meeting as a guest of Los Angeles County Director of Public Works, Mark Pestrella.

On November 7, 2023, attended the MWD Groundwater Coordination Meeting, discussing the status of their incentive programs.

On November 7, 2023, participated in the COG Water Committee meeting discussing legislative priorities for the coming year and an update from the Committee on their involvement with the Safe Clean Water Program.

On November 13, 2023, attended the SGVMWD Board Meeting, where they discussed the status of their pipeline project and updates on State Water Project deliveries.

On November 14, 2023, attended the Groundwater Replenishment Coordinating Group to discuss collaboration and coordination of imported and local deliveries for groundwater recharge.

On November 16, 2023, attended the San Gabriel Mountains National Monument Community Collaborative meeting held in Arcadia. The meeting included discussion on where the collaborative goes from here, now that the forest plan is completed, how can we assist the forest service in implementing targeted projects and programs.

On November 21, 2023, chaired the Rio Hondo WASC as part of the Safe Clean Water Program. The Committee discussed a project proposal from Cal Poly as they begin to look at the effectiveness of dry wells.

On November 22, 2023, the Assistant Executive Officer as the Chair of the Integrated Regional Water Management Plan (IRWM) Upper San Gabriel Steering Committee, attended a meeting with County representatives and project proponents (Valley County Water District) to discuss delayed funding of approved grants.

On November 27-30, 2023, attended the Association of California Water Agencies (ACWA) Conference in Indian Wells. Session content was very diverse and included workforce retention, recharge projects, Bay Delta, and many technical advancements.

On December 1, 2023, together with Chair Noriega, met with Assemblymember Blanca Rubio to discuss San Gabriel Valley Water Association (SGVWA) Legislative priorities and opportunities for inclusion.

On December 5, 2023, participated in the USG-3 Replenishment Coordination meeting focused on maximizing available imported water supplies.

On December 5, 2023, attended the Puente Valley Operable Unit (PVOU) project update meeting, where representatives detailed the status of the construction at the remediation site.

On December 6, 2023, attended the Greater Los Angeles IRWM Leadership Committee. County staff provided an update on projects through the four rounds of funding and proposed implementation changes from Department of Water Resources (DWR) for future rounds.

On December 6, 2023, attended the Upper District Board Meeting.

On December 7, 2023, attended the MWD Groundwater Managers meeting to discuss proposed incentive programs and supplies.

On December 7, 2023, attended the SCWUA Christmas Luncheon.

On December 11, 2023, participated in the SGVMWD Board Meeting, which included an update on their pipeline project.

On December 11, 2023, met with Melissa Barbosa to provide an overview of her new appointment as a Watermaster Board Member.

On December 12, 2023, met with representatives from WRD regarding river and lower area accounting.

On December 13, 2023, met with representatives from CityWorks to discuss the next phase of the outreach campaign and develop social media posts.

On December 19, 2023, attended the USG-3 Replenishment Coordination meeting.

On December 19, 2023, conducted a site visit to the new La Puente Valley County Water District PVOU site to gather necessary reporting information and understand the current and proposed operations.

On December 20, 2023, participated in the TVMWD Board Meeting. The main point of discussion was Board Member outreach and sponsorship budgets.

On December 20, 2023, met with LA County Safe Clean Water Program representatives regarding the upcoming adoptions of annual plan guidelines, notably targets for stormwater capture.

On January 9, 2024, met with Los Angeles County representatives regarding the status of projects within the Basin and Watershed.

On January 9, 2024, attended the COG Water Committee meeting discussing legislative priorities and the upcoming tour of the Grace F. Napolitano Water Recycling Facility.

On January 10, 2024, attended the Three Valleys Municipal Water District's Water Resources Master Plan Workshop.

On January 11, 2024, participated in MWD's Groundwater Committee Meeting where the topic of discussion was delivery alternatives.

On January 11, 2024, attended Upper District's USG-3 Proposed Improvements meeting. Topics at the meeting included rebuilding the Arizona Crossing, USG-3 outlet changes, and acquisition of pits for additional spreading.

On January 16, 2024, participated in the San Gabriel River Water Committee meeting where they discussed flows in the river and canyon.

On January 16, 2024, attended the Rio Hondo WASC as part of Los Angeles County's Safe Clean Water Program.

On January 18, 2024, attended the Upper San Gabriel River WASC as part of Los Angeles County's Safe Clean Water Program.

On January 23, 2024, attended the Groundwater Replenishment Coordinating Group meeting. The group discussed current hydrologic conditions, expected deliveries, and planned maintenance.

On January 23, 2024, attended the El Monte Operable Unit (EMOU) Project Committee Meeting.

On January 24, 2024, attended the Greater Los Angeles IRWM Leadership Committee meeting.

On January 30, 2024, attended the South El Monte Operable Unit (SEMOU) Project Committee Meeting.

On January 31, 2024, attended the Public Water Agencies Group (PWAG) meeting, and the Assistant Executive Officer participated in the Los Angeles County Safe Clean Water Program, Regional Oversight Committee meeting to express our comments on the new reporting guidelines.

On February 6 and 7, 2024, Watermaster staff attended the AGWA/AGWT Conference in Ontario. Speakers included information on new technologies, enhanced mapping and modeling tools, treatment processes for emerging contaminants.

On February 12, 2024, attended the SGVMWD Board Meeting where discussion included their ongoing strategic planning process and pipeline maintenance project. Also attended the UD Water Resources and Facilities Planning Committee meeting focused on MWD's Pure Water Project status and corresponding rate considerations.

On February 12, 2024, participated in the Puente Basin Water Agency Stakeholder meeting regarding their Groundwater Sustainability Agency (GSA) filing.

On February 14, 2024, attended Upper District's Board Meeting and subsequent Producer meeting. Discussions included Metropolitan Water District's (MWD) proposed calendar year 2024 and beyond rates.

On February 20, 2024, attended the San Gabriel River Water Committee meeting. Discussion included local and imported delivery expectations as well as the upcoming retirement of Mr. Don Berry.

On February 21-22, attended the Urban Water Institute Conference in Palm Springs. Topics of interest included outreach and messaging, farmland challenges, and State-wide water allocations.

February 23, 2024, participated in a legislative tour with Assemblymembers Blanca Rubio and Diane Papan. The tour featured local, imported, and treated water systems in the San Gabriel Valley.

On February 29, 2024, attended the Three Valleys Municipal Water District's Leadership Breakfast featuring a speaker on the Sites Reservoir plan.

On March 4, 2024, participated in the California Groundwater Coalition meeting. The focus of the discussion was reviewing proposed bills and legislative engagement.

On March 4, 2024, met with representatives from Department of Toxic Substances Control (DTSC) on the WNOU remedy to discuss challenges being faced as they work to re-activate the plant to full design capacity.

On March 5, 2024, participated in our regular meeting with Los Angeles County Flood Control District regarding project status and local conditions.

On March 6, 2024, joined the Three Valleys Board Meeting featuring a presentation from MWD representatives Adan Ortega (Chair) and Deven Upadhyay (AGM) discussing MWD supply update and outlook.

On March 11, 2024, attended the SGVMWD Board Meeting where discussions included their pipeline construction update and State Water Project projections.

On March 13, 2024, attended the UD Board Meeting. Information regarding MWD's rate process and options to help fund needed capital during this time of low water sales was presented.

On March 19, 2024, attended the Committee of Nine meeting, where the Committee reported on diversions, planning efforts and the upcoming retirement of Don Berry.

On March 19, 2024, participated in the Groundwater Replenishment Coordinating Group to discuss local, imported, and recycled water accounting and proposed projects,

On March 19, 2024, participated in the Rio Hondo WASC meeting on project proposals for the next funding round. Cal Poly Pomona is proposing a study of the efficiency of dry wells.

On March 28, 2024, participated in MWD's San Gabriel Basin Agencies Executive Committee on Pure Water Southern California.

On April 3, 2024, attended Upper District's Water Resources and Facility Management (formally called Water Policy). The Committee discussed treated connection projects currently being considered with San Gabriel County Water District and Sunny Slope Water Company, as well as an update on proposed improvements at USG3.

On April 8, 2024, attended a Status Conference Hearing with the Honorable Judge, Maureen Duffy-Lewis.

On April 10, 2024, held a meeting with City Works for an introduction to the services they provide Watermaster and a discussion of their proposed budget for the coming fiscal year.

On April 10, 2024, attended Upper District's Producers Meeting followed by their Board Meeting. The Producers discussed a desire for Upper District to isolate and account for, within their surcharge, the significant increases proposed by MWD to their Ready to Serve charge. At their Board Meeting, Upper District agreed to revisit their proposed fee schedule and structure to explore options to address the Producer's suggestions.

On April 13, 2024, staffed an educational booth at Los Angeles County Sanitation Districts Earth Day event.

On April 15, 2024, met with Stetson Engineers for an introduction to the services they provide Watermaster and an explanation of their budget.

On April 16, 2024, attended the Committee of Nine meeting. The Committee discussed canyon conditions, rainfall, and transition plans following the retirement of Don Berry.

On April 16, 2024, attended the Safe, Clean Water Program's Rio Hondo WASC meeting focused on the current funding round and project scoring.

On April 16, 2024, attended Watermaster's Administrative Committee Meeting. The Committee discussed Watermaster's proposed budget and Watermaster's water quality testing policy. The Committee directed staff to review water quality testing commitments previously made by the Board and then develop an updated policy for water quality testing.

On April 18, 2024, met with Upper District's general manager and finance manager to follow up on their Board's direction to restructure their surcharge to better reflect increases in Metropolitan's Ready to Serve Charge.

On April 19 and 20, 2024, attended the Three Valleys / MWD Inspection Trip of the State Water Project.

On April 23, 2024, attended the PVOU meeting. The Group discussed the progress and status of the project remedy and surrounding water quality quarterly reports.

On April 24, 2024, attended the West Fork Working Group's meeting. The Group discussed canyon conditions and Don Berry's upcoming retirement.

On April 25, 2024, met with Ortega Strategies Group for an introduction to the services they provide Watermaster and an explanation of their budget.

On April 29, 2024, attended a meet and greet event with Los Angeles County's Supervisor Lindsey Horvath. Following that event, we participated in the County's Water Resiliency Summit. County staff and other speakers discussed the benefits of the County's Water Plan to the region.

On May 2, 2024, attended Three Valleys Municipal Water District's (Three Valleys') Water Resources Master Plan and Drought Contingency Plan Workshop 3.

On May 6-9, 2024, attended the ACWA's semi-annual conference in Sacramento. While there, we also participated in the ACWA Joint Powers Insurance Agency's membership meeting.

On May 11, 2024, operated an informational booth at Upper District's Waterfest event held at Santa Anita Regional Park in Arcadia. Also attended the event and participated in Upper District's programming for elected officials and other dignitaries.

On May 13, 2024, attended SGVMWD's (San Gabriel District's) Board Meeting.

On May 14, 2024, met with staff from the County of Los Angeles (County) and the Responsible Agencies regarding coordination of imported water deliveries.

On May 14, 2024, attended an individual Bimonthly Coordination meeting with County staff to discuss ongoing issues.

On May 14, 2024, met with Upper District staff to discuss their proposed rate increases for water sales.

On May 15, 2024, attended Three Valleys' Board Meeting.

On May 15, 2024, organized and participated in the Basin Water Management Committee meeting.

On May 17-19, 2024, attended Upper District's State Water Project Inspection Tour.

On May 21, 2024, attended the Committee of 9 Board Meeting.

On May 21, 2024, attended a meeting of the Groundwater Replenishment Coordinating Group.

On May 22, 2024, met with the GMs from the Responsible Agencies to continue discussions on imported water deliveries.

On May 29, 2024, met with Three Valleys to discuss individual concerns with imported water deliveries.

On May 30, 2024, attended a meeting of the California Groundwater Coalition's Legislative group.

On Thursday, June 6, 2024, participated in a tour of the Pure Water facility and Weymouth Treatment Plant hosted by Three Valleys Municipal Water District (Three Valleys) and Upper District

On Monday, June 10, 2024, attended the SGVMWD's (San Gabriel District) Monthly Board Meeting.

On Wednesday, June 12, 2024, attended Three Valleys' Monthly Member Agency Managers Meeting.

Later that day, attended Upper District's Board Meeting

On Thursday, June 13, 2024, attended a BPOU meeting. Later that day, the Assistant Executive Officer attended a Puente Valley Operable Unit meeting.

On June 17, 2024, met with County staff to discuss concerns about algae growth in County water conservation facilities.

On June 18, 2024, attended the Committee of Nine Monthly Meeting.

On June 19, 2024, attended Three Valleys' Board Meeting.

On June 19, 2024, attended Upper District's Producer Meeting.

On June 19, 2024, organized and participated in Watermaster's Basin Water Management Committee's meeting.

On June 19, 2024, met with the three Responsible Agencies to coordinate imported water deliveries.

On June 26, 2024, hosted a meeting for staff from the County and MWD to discuss mitigation measures for algae growth in County water conservation facilities.

On June 27, 2024, led a Southern California Water Utilities Association tour of Azusa Canyon and its water conservation infrastructure.

On June 27, 2024, organized and participated in Watermaster's Producer Meeting.

Organized and Participated in SGVWA Meetings

(SGVWA) Board Meeting

- July 24, 2023 via Zoom. The meeting included an overview of the Strategic Planning session held in April and also water supply conditions.
- October 23, 2023. The meeting included an update on legislative issues discussed during the year, as well as the annual election.
- January 22, 2024. The meeting included discussion on Committee assignments and legislative outlook, as well as a Sacramento Legislative Action Day.
- March 25 2024. Discussed proposed budget and assessments and May's quarterly meeting.
- April 22, 2024. The meeting included an update on legislative matters, local conditions, and agency updates.

(SGVWA) Quarterly/Annual Meetings

- February 8, 2024 (quarterly meeting). The meeting featured guest speaker Darcy Burke who provided insight and expertise in managing through succession planning and leadership goals.
- May 16, 2024 (quarterly meeting).
- November 8, 2023 (annual meeting). The meeting featured a presentation to Congresswoman Grace Napolitano recognizing her tremendous support for San Gabriel Valley Water issues.

(SGVWA) Legislative Meetings

- November 9, 2023. Facilitated discussions with the Bylaws Ad Hoc Committee.
- March 25 2024. Discussed proposed legislation.

Coordinated and Participated in Central Basin Water Association (CBWA) Meetings

(CBWA) Board Meetings

- October 2, 2023. The meeting included an update on Central Basin groundwater production, imported water deliveries and per- and polyfluoroalkyl substances (PFAS) assistance programs. Also, the Board has appointed two new Board Members to fill vacancies.
- December 4, 2023, meeting included information on Production in the Central Basin, an update on Central Basin Municipal Water District activities by Dr. Alex Rojas, a legislative update by CBWA Lobbyist, Ms. Jennifer Capitolo, and appointment of Treasurer and River and Mountains Conservancy representative.
- March 4, 2024. Discussion included water supply conditions in the Central Basin and the upcoming contact hour workshop scheduled for April 24, 2024.
- April 1, 2024. The meeting included a brief report from WRD on water levels, production, and their budget process.

(CBWA) Quarterly/Annual Meetings

- August 7, 2023. The meeting featured Keynote Speaker Jennifer Capitolo and included information on Production in the Central Basin, water levels and WRD assistance programs.
- November 2, 2023. The presenter was Los Angeles County Flood Control District's Matt Frary discussing the County Water Plan and Safe Clean Water Program.
- February 1, 2024. The meeting featured a program from the River Watermaster.
- May 2, 2024. Annual Board Meeting.

Participated in BPOU Project Agreement and Other Meetings

- August 14, 2023, processed BPOU budgets in accordance with the Project Agreement and also coordinated individual Producer meetings with the CR's.
- August 29, attended a meeting with San Gabriel Valley Water Company to discuss its B6 plant operations.
- On December 14, 2023, coordinated and participated in the BPOU quarterly meeting

Participated in Safe Clean Water Program – WASC

- February 2023 update: the program is completing its progress report and taking input from the Regional Oversight Committee for the next Guidance document update.

Coordinated, Participated, Organized and Hosted SGVPA Meetings.

- March 11, 2024. Coordinated and participated in the SGVPA Executive Committee meeting. Items of discussion included the annual budget and appointment of Officers and Committee Members.
- April 22, 2024. Organized and hosted the Annual and Organizational Meetings of the SGVPA. The meeting included information on local rainfall and runoff, the adoption of the annual budget, and the election of officers.
- May 13, 2024. Coordinated an in-person meeting of the SGVPA's Distribution Committee. We also participated in their subsequent discussions over email on Wednesday, May 29, 2024.

Participated in IRWMP Meetings

- May 16, 2024, participated in the Upper San Gabriel and Rio Hondo IRWM Steering Committee meeting.
- May 22, 2024, participated in the IRWM Leadership Committee meeting.

APPENDIX B

MAIN SAN GABRIEL BASIN WATERMASTER OVERVIEW

APPENDIX B

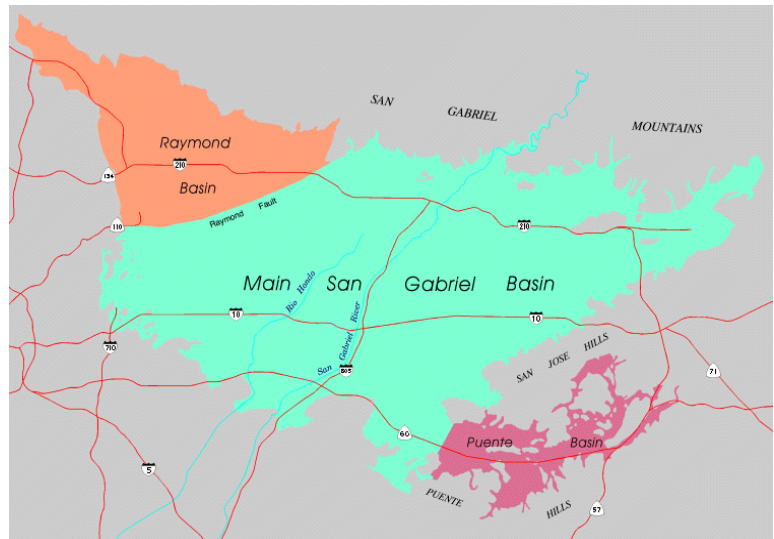

MAIN SAN GABRIEL BASIN OVERVIEW

INTRODUCTION

The Main San Gabriel Basin is situated in the southeasterly portion of Los Angeles County, bounded on the north by the San Gabriel Mountains, on the northwest by Raymond Basin, on the southeast by Puente Basin, and on the south by Central Basin.

FORMATION AND PURPOSE OF WATERMASTER

The Main San Gabriel Basin groundwater and surface water rights were adjudicated in 1973, and the Court established the Main San Gabriel Basin Watermaster (Watermaster) to manage the water supply and water quality of the Main San Gabriel Basin. The Judgment was entered January 4, 1973 and from its inception, water quality has been one of Watermaster's responsibilities. Section 26m of the original Judgment (amended Section 34m) states "Water quality in the Basin shall be a concern of Watermaster and all reasonable steps shall be taken to assist and encourage appropriate regulatory agencies to enforce reasonable water quality regulations affecting the Basin..."

OVERVIEW

County: Los Angeles (southeasterly portion).

Area: 107,000 acres/167 square miles.

Population: 1,216,931 (2020 Data).

CASGEM RANK: Very Low (Pursuant to document entitled "2019 SGMA Basin Prioritization Process and Results").

Watermaster: Main San Gabriel Watermaster.

Members: Nine-person board appointed by LA County Superior Court; six elected by water Producers, three nominated by municipal water districts.

Court Case: Upper San Gabriel Valley Municipal Water District, Plaintiff, vs. City of Alhambra, et al. Defendants, Superior Court of the State of California (Case No. 924128).

BASIN LOCATION AND DESCRIPTION:

The Main San Gabriel Basin occupies most of the San Gabriel Valley. It encompasses about 107,000 acres, and the amount of groundwater in storage was 8.6 million acre-feet when the groundwater elevation at the Baldwin Park Key Well was 316 feet on September 30, 1944. In general, one foot of groundwater elevation change is equivalent to about 8,000 acre-feet in storage. Hydrogeologically, the San Gabriel groundwater Basin is divided between three adjudicated sub-basins: Main Basin, Puente Basin, and portions of Six Basins area.

In addition, there is the Spadra sub-basin, which is not adjudicated. Collectively, the Main San Gabriel Basin and Puente Basin are bounded on the north by the San Gabriel Mountains, on the east by the San Jose Hills, on the south by the Puente Hills, and the Raymond Fault on the west. The San Gabriel River and Rio Hondo, a distributary of the San Gabriel River, drain the San Gabriel River watershed. The Puente Basin is

in the southeast and is a tributary of the Main Basin. The Six Basins area is located in the northeast and a portion is tributary of the Main Basin. They are each adjudicated and managed separately. The aquifers are located inland (saltwater intrusion is not a risk) and are unconfined. In the San Gabriel Valley, average precipitation over the past 100 years is approximately 18.5 inches but the average over the past ten years is only 17.2 inches.

The major sources of natural recharge to the Main San Gabriel Basin are infiltration of rainfall on the valley floor and runoff from the nearby mountains. The Main San Gabriel Basin is the first of a series of basins (including Puente, Central, and West Coast Basins) to receive the benefit of mountain runoff, and the Basin interacts hydrogeologically and institutionally with these adjoining basins. In the mid-1800s, agriculture and ranching were the primary economy in the Basin. The Main San Gabriel Basin's current land use is primarily urban.

Total production over the past ten years, including groundwater and treated local surface water has been decreasing, peaking at about 242,900 acre-feet in fiscal year 2012-13 and falling to about 168,400 acre-feet by fiscal year 2022-23). Fiscal year 2023-24 production has slightly increased to about 171,300 acre-feet. The majority of pumping is conducted by municipal water purveyors, and a lesser amount of production is conducted by rock and gravel companies. Most communities depend almost entirely on Main San Gabriel Basin groundwater for their water supply, and also benefit from indirect access to untreated imported water, which is used to replenish the groundwater Basin.

NEED FOR ADJUDICATION

Beginning in the 1940s, the San Gabriel Valley experienced rapid urbanization as well as a decrease in recharged wastewater due to an increase in sewage exports. This led to increased demand for water drawn from the Main San Gabriel Basin. By the 1950s, the Main San Gabriel Basin was in a state of overdraft and parties downstream from the Main San Gabriel Basin, including agricultural and urban water purveyors in the Central and West Coast Basins, became concerned. These downstream users (primarily the municipal providers for Compton, Long Beach and the Central Basin) who relied on the San Gabriel River system for their natural water supply as it flowed through the Whittier Narrows, initiated a legal action (the Long Beach Judgment of 1965). This resulted in a court decision requiring Main San Gabriel Basin water users to guarantee a defined and calculated annual amount of water to downstream basins. For several years, the Upper San Gabriel Valley Municipal Water District (USGVMWD) administered and took responsibility for the Main San Gabriel Basin's obligations to these downstream groundwater basin water users. In 1968, the Main San Gabriel Basin municipal water producers requested the Upper San Gabriel Valley Municipal Water District file a complaint to adjudicate water rights in the Main San Gabriel Basin and bring Main San Gabriel Basin producers under control of one governing body. This complaint, initiated by municipal users and filed by the Upper San Gabriel Valley Municipal Water District, became the basis for the 1973 Main San Gabriel Basin Judgment. Rather than adjudicate based on mutual prescription, as was done in Central and West Coast Basins, municipal users in the San Gabriel Valley chose to negotiate in a "friendly" adjudication. The water association commissioned a consultant and legal counsel to develop the negotiated settlement and management plan. This became the stipulated Judgment, which was accepted by the court in 1973.

JUDGMENT AND AMENDMENTS

Type of action: Stipulated Judgment and lawsuit.

Adjudication initiated: 1968

Adjudication finalized: 1973

Revisions or amendments: 1989, 1991, 1992, 2012

Other significant dates: 1965 Long Beach Judgment and 1972 Puente Narrows Agreement.

Costs: \$4,000,000 to \$5,000,000 per year.

DECREE SUMMARY:

The Main San Gabriel Judgment defined water rights for about 190 original parties, created the Main San Gabriel Basin Watermaster as the governing body, and described a Physical Solution for water management. The Physical Solution provides for Watermaster control of Basin management, and flexibility

in initiating cooperative agreements, regulating and controlling pumping, purchasing replacement water, and determining the natural and operational safe yields (see below). The Judgment allows for overproduction of rights, but overproduction incurs a Replacement Water Assessment. Subsequent amendments clarified and extended Watermaster's role. Both groundwater and surface water rights in the Main San Gabriel Basin were adjudicated under five classes of water rights. 1) Groundwater rights based on mutual prescription (see Raymond Basin) and comprised about 95 percent of annual water rights for direct use. Each pumper's share was a percentage of the total adjudicated rights. 2) Base annual diversion rights, which are surface rights held by parties not owning groundwater (prescriptive) pumping right. 3) Integrated production rights held by Producers with combined surface and groundwater rights, which allows for greater diversions and use of less groundwater in wet years, and then carrying over unused prescriptive rights to the following year. 4) Special rights that are allocated to MWD for its dam and reservoir and to LA County Flood Control District for its reservoir. 5) Non-consumptive user rights for parties operating spreading facilities. Pumpers whose production exceeds their water rights pay an assessment to finance the purchase of replenishment water. The Judgment placed injunctions against unauthorized production, non-consumptive uses (not including spreading), unauthorized recharge, and exporting native water from the Main San Gabriel Basin.

JUDGMENT AMENDMENT SUMMARY:

In 1991, Watermaster was given authority to allow recharge of up to 30,000 acre-feet per year of recycled water as supplemental water and was also given authority to control pumping for water quality improvement purposes and enter into agreements with the EPA to facilitate groundwater cleanup. In 2012, Watermaster was given authority to develop and levy a Water Resource Development assessment (RDA) to bring additional untreated imported water into the Main San Gabriel Basin. Initially, Watermaster levied an RDA (referred to as RDA I) to create an emergency reserve of untreated imported water stored in the Main San Gabriel Basin to be used in the event untreated imported water was not available to satisfy a Replacement Water obligation. As a result of the prolonged drought, Watermaster and the Producers cooperatively developed the RDA II program, which generates revenue to purchase untreated imported water to supplement the lack of stormwater replenishment as the result of continued drought conditions. The RDA II program is also complimentary to the groundwater basin management mandate included in the "Sustainable Groundwater Management Act" (SGMA).

Two other judgments were acknowledged in the Main Basin adjudication. **The Long Beach Judgment**, rendered by the Superior Court in 1965, which guarantees Central and West Coast Basins an average annual water supply of about 98,000 acre-feet per year through the Whittier Narrows. **The Puente Narrows Agreement** of 1972 between Puente Basin Water Agency and Upper San Gabriel Valley Municipal Water District calculates and governs subsurface outflow from Puente Basin to the Main San Gabriel Basin. This agreement calls for an average Base Underflow of 580 acre-feet per year from Puente Basin to the Main San Gabriel Basin. The Main San Gabriel Watermaster adheres to both rulings.

WATER USERS

Stipulated Users:

Stipulated users originally included about 190 parties of which about 40 were municipal purveyors. Designated parties to the Judgment included the Upper San Gabriel Municipal Water District, the Three Valleys Municipal Water District, the San Gabriel Valley Municipal Water District, about 40 other public and investor owned water supply agencies, 15 industrial customers, and eight agricultural and golf course pumpers.

Current Users:

About Forty-five private parties or companies pump directly. A number of parties have rights to divert surface flows.

MANAGEMENT STRUCTURE

Main San Gabriel Basin Watermaster is a nine-person board, appointed by Los Angeles County Superior Court, which manages and controls the withdrawal of groundwater and surface water, and coordinates water deliveries and recharge. The Watermaster Board is comprised of six individuals elected by water producers and three by water districts (two by Upper San Gabriel Valley Municipal Water District and one by the San Gabriel Valley Municipal Water District). Each member serves a one-year term. Several advisory committees have been established to assist the Watermaster Board. Its membership includes Watermaster board

members and may also include advisory committee members who are not Watermaster board members. Watermaster has a staff and engages consultants for special projects.

Watermaster's responsibilities include: managing and controlling the withdrawal and replenishment of water supplies in the Basin; determining the Operating Safe Yield annually; raising replenishment revenue by means of assessments, and acquiring and spreading untreated imported water for groundwater replenishment; raising revenue by means of assessments and acquiring and spreading untreated imported water to supplement the lack of stormwater runoff; coordinating local involvement in efforts to preserve and restore the quality of the Basin's groundwater; assisting and encouraging regulatory agencies to enforce water quality regulations in the Basin; collecting production, water quality, and other relevant data from producers; and preparing an annual report.

The Upper San Gabriel Valley Municipal Water District, Three Valleys Municipal Water District, and San Gabriel Valley Municipal Water District deliver supplemental State Water Project (SWP) water to the Basin. The County of Los Angeles Department of Public Works (LACDPW) plays a role in ensuring groundwater Basin replenishment from local stormwater runoff is coordinated with replenishment of supplemental SWP water. The San Gabriel Basin Water Quality Authority obtains some funding for the Main San Gabriel Basin's cleanup activities. The San Gabriel River Watermaster calculates the Main San Gabriel Basin's credits and debits pursuant to the terms of the Long Beach Judgment.

MANAGEMENT STRATEGIES

Main San Gabriel Basin demand is satisfied about 85 percent from local groundwater, 10 percent from treated imported water and 5 percent from other local supplies (recycled water and local surface water diversions). In addition, an average of about 40,000 acre-feet per year of untreated imported water historically has been delivered for Main San Gabriel Basin replenishment (Replacement Water). Also, during fiscal year 2016-17, Watermaster implemented the RDA program to deliver untreated imported water to the Main San Gabriel Basin to supplement stormwater runoff replenishment. The RDA program delivered about 43,900 acre-feet of wet water to the Main San Gabriel Basin during fiscal year 2023-24 and about 5,300 acre-feet of RDA funds was applied through MWD's Cyclic Storage Letter Agreement. The typical Main San Gabriel Basin operating range for water levels is between 200 and 250 feet MSL (above mean sea level).

There are about 17 spreading basins in the Main San Gabriel Basin, covering more than 1,100 acres, which are operated by Los Angeles County Department of Public Works (LACDPW) or other agencies capable of capturing storm-water runoff from adjacent canyons and/or imported water. The spreading capacity of existing facilities is more than 600,000 acre-feet per year.

In 1983, the agencies in the San Gabriel River Watershed formed the Groundwater Replenishment Committee. They agreed to coordinate deliveries of local, recycled and imported water for groundwater replenishment, and identify future needs and potential replenishment facilities.

Watermaster, municipal water districts, and Producers have various cyclic storage agreements in which untreated imported water is stored in the Main San Gabriel Basin and extracted when imported water supplies are short. Imported water is credited to these cyclic storage accounts.

Metropolitan also delivers replenishment water to the Main San Gabriel Basin, through sales to Three Valleys Municipal Water District and Upper San Gabriel Valley Municipal Water District. During calendar year 2017, calendar year 2019, and calendar year 2024, Metropolitan entered into separate agreements to deliver untreated imported water into the Main Basin, with payment arrangements for the water occurring in equal amounts over five consecutive years for 2017 and 2019 and ten consecutive years for 2024.

MONITORING AND REPORTING

There are about 250 wells in the Main San Gabriel Basin, 200 of which are active. There are about 20 non-municipal wells. Most of these wells are monitored by Watermaster for water quality parameters. In addition, the Basin-wide Groundwater Elevation Monitoring Program (BGWEMP) is a network of wells in the Main San

Since 2011–12, Watermaster has brought in an additional 185,600 acre-feet of RDA water and 568,700 acre-feet of imported untreated water, representing about 94 feet at the Key Well.

Gabriel Basin that are regularly measured by the Watermaster on a permanent basis. The program is designed to facilitate coordination of existing water-level monitoring done by agencies. In addition, each adjudicated party is obligated to file a quarterly report with the Watermaster showing the total pumping and diversion amounts.

SAFE YIELD

Groundwater storage capacity was determined by Department of Water Resources (DWR) in 1975 to be 10,438,000 acre-feet. The Main San Gabriel Basin Judgment determined the Natural Safe Yield of Main Basin to be 152,700 acre-feet on the basis of 1967 conditions but is close to 185,000 acre-feet based on 2016 conditions. Watermaster annually determines the Operating Safe Yield (OSY) as the amount of groundwater that can be pumped in a fiscal year without replacement water assessments. The main factors in making this determination are rainfall, runoff amounts, and groundwater levels. In 2005-06 the OSY was 240,000 acre-feet, and in 2023-24 the OSY was 150,000 acre-feet. Producers may pump in excess of annual pumping rights but must pay for supplemental untreated imported water to replenish the Basin. Any entity that wishes to spread or store supplemental water within the Main San Gabriel Basin for later recovery must have a cyclic storage agreement with the Watermaster. These agreements typically have five-year or ten-year terms.

GROUNDWATER PUMPING AND OVERDRAFT

In 1944, water stored in the Main San Gabriel Basin was approximately 8,600,000 acre-feet and had decreased to 7,900,000 acre-feet by 1960. The Main San Gabriel Basin was considered over drafted since 1953, which prompted the Main Basin adjudication. Since establishment of Main San Gabriel Basin Watermaster, groundwater recharge (local and imported water) in the valley has averaged about 150,000 acre-feet per year. As part of the Judgment, Watermaster recharges replacement water to maintain the water level at the Baldwin Park Key Well above elevation 200 feet. The highest operational groundwater elevation at the Key Well since the Judgment occurred in 1983 was 294 feet. In 2018 the groundwater elevation at the Key Well was 169 feet, which represents a historic low. Watermaster established the OSY for 2023-24 of 150,000 acre-feet, while the annual pumping production in 2023-24 was approximately 171,300 acre-feet. Consequently, the Replacement Water obligation including withdrawal from producer cyclic storage, was about 16,600 acre-feet.

WATER QUALITY ISSUES

Four areas of the San Gabriel Valley Groundwater Basin are Superfund Sites. Contaminants such as Trichloroethylene, Perchloroethylene, Carbon Tetrachloride, Perchlorate, N- Nitrosodimethylamine, and 1, 4-Dioxane impact Whittier Narrows, Puente Basin, Baldwin Park and El Monte areas. As an example, a current project of the Watermaster (along with six other water entities) is to clean up the Baldwin Park Operable Unit. As a result of the negotiated agreement, parties have agreed to pay tens of millions of dollars towards research, cost recovery, and treatment plant construction. Those facilities have operated for over 17 years and continue to operate.

DROUGHT

Watermaster undertakes many initiatives to address water shortages. These include:

1. Maintaining a low Operating Safe Yield (OSY).
2. Establishing a reliability storage program with a target reserve of 100,000 acre-feet of untreated imported water (RDA I).
3. Implementing a stormwater augmentation program with a target delivery of 40,000 acre-feet per year of untreated imported water for general Basin benefit (RDA II).
4. Implementing a new assessment to pay for these two programs.
5. Collaborating on the Metropolitan Water District (MWD) Regional Recycled Water Program, which is planned to deliver large amounts of highly treated recycled water into the Basin to supplement imported supplies and decreased local runoff in dry years.
6. Looking into imported Colorado River water on a limited basis for additional supply; and
7. Expanding retail conservation outreach.

The Regional Recycled Water Program is expected to bring long-term water balance to the Basin.

PRODUCTION AND REPLENISHMENT FOR 2023-24

Management efforts are being made to ramp down pumping and 2023-24 groundwater production was approximately 171,300 acre-feet. This was higher than the OSY for 2023-24 at 150,000 acre- feet. After considering the use of carry-over rights for some of the production, about 16,600 acre-feet will need to be delivered as untreated imported water due to over production (a portion of which will be deducted from Producers cyclic storage accounts as a pre-delivery of Replacement Water).

ADJUDICATION EFFECTIVENESS

The groundwater level in the Baldwin Park Key Well is used by Watermaster to monitor changes in groundwater supply for the Basin. The water level in this well fluctuated over 100 feet in elevation over the last 35 years from a high in 1983 to a low in 2018. Nonetheless, over the four decades between its formation in 1972 and the historic extreme drought that began in 2011, Watermaster succeeded in balancing Basin supplies—with the Key Well level starting and ending that 40-year period essentially unchanged.

Over the past decade, however, winters have generally been drier. With very low local water supplies available during the historic drought the Key well level began falling. Watermaster undertook extensive new management actions to respond to the drought as described above under “Drought” above. Nonetheless, in 2018 the groundwater elevation at the well was 169 feet, which represents a historic low.

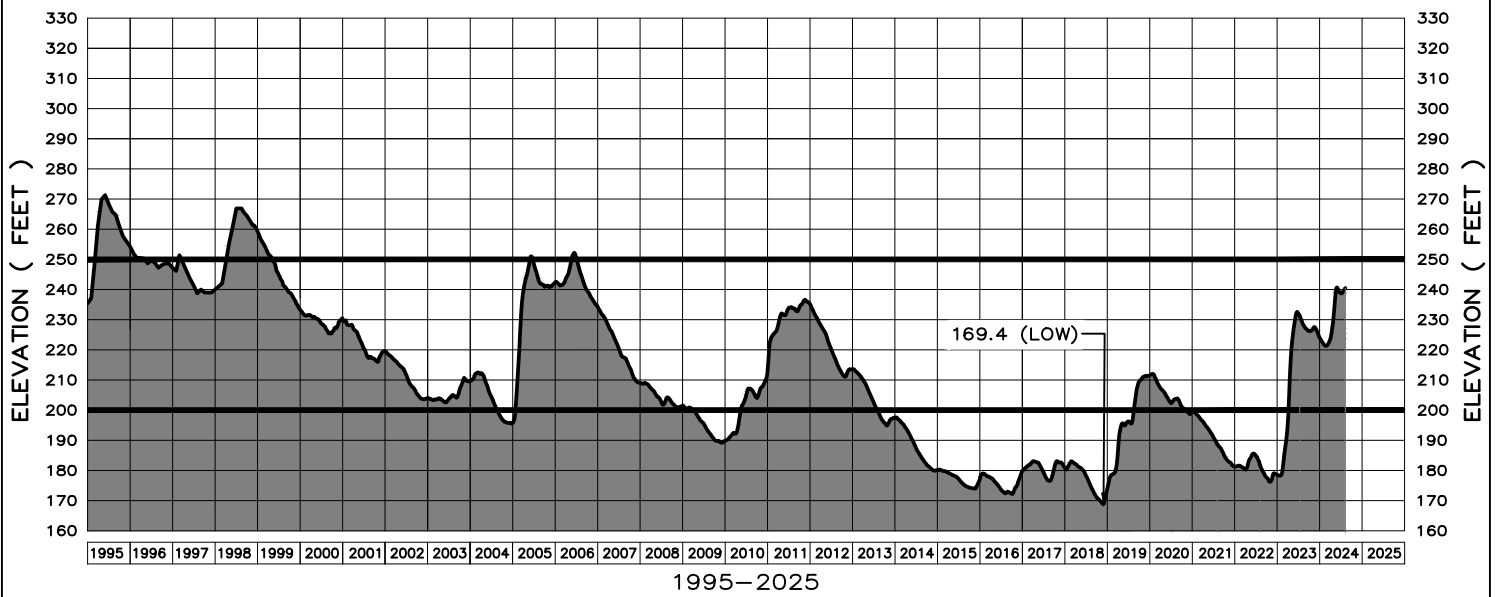

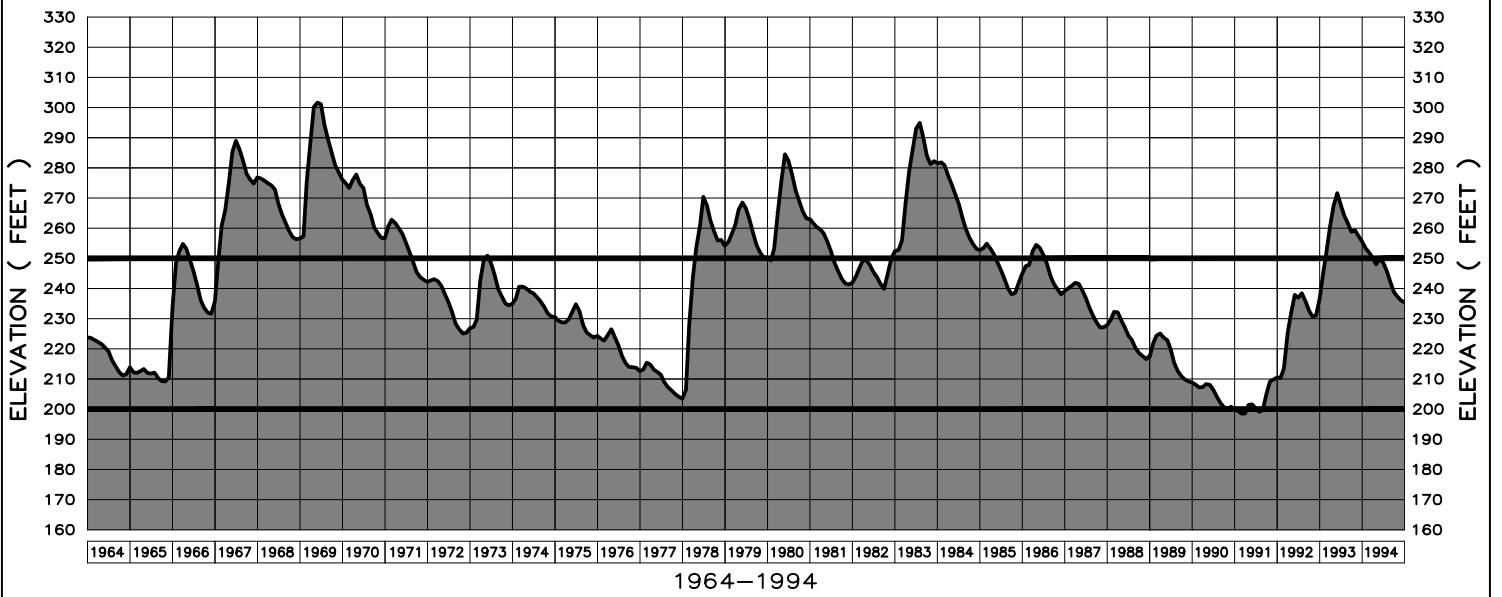

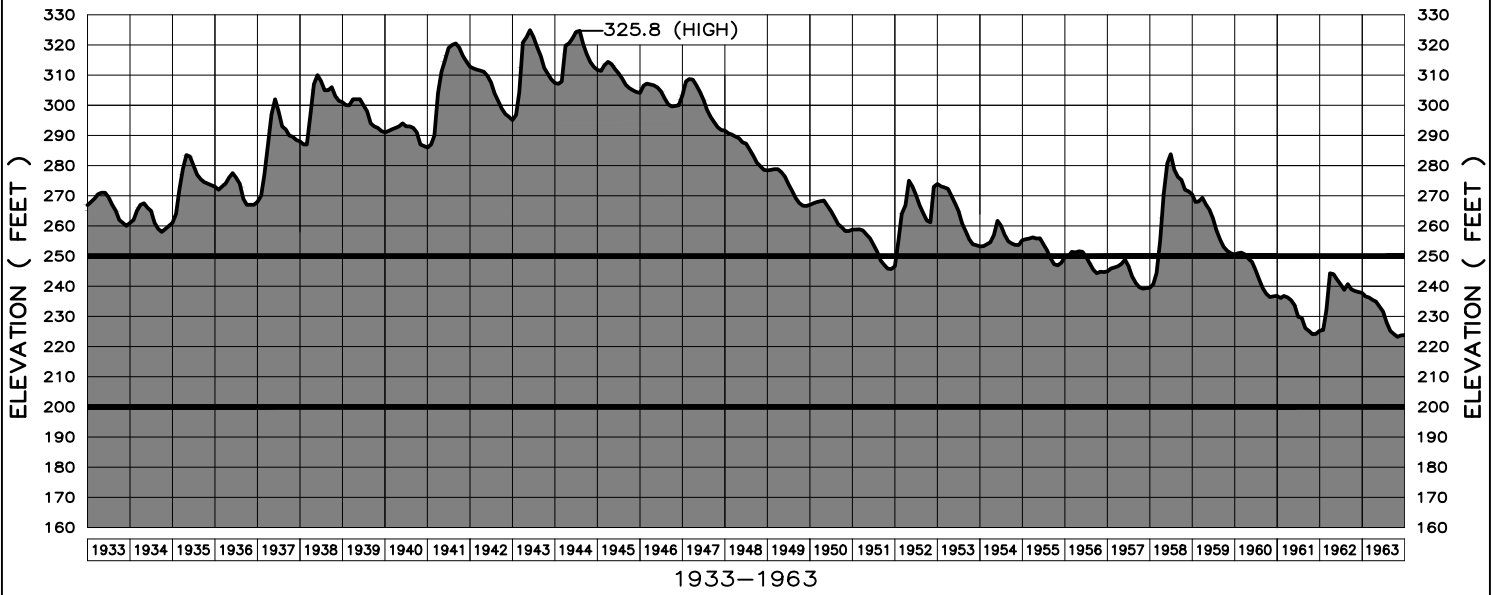

Consequently, Watermaster implemented a series of actions described above to ensure reliable water supplies and to maintain Basin groundwater levels, which was about 240 feet amsl as of June 30, 2024, and are within the operating guidelines for the Key Well, due to above average rainfall during fiscal year 2023-24. Without Watermaster implemented actions, which includes Cyclic Storage and RDA, the Key Well would have fallen to about 202 feet.

Overall, the management structure has been effective in its ability to work collaboratively with overlapping agencies and basins (e.g., through the Long Beach Judgment and through joining regional and statewide drought and water supply programs).

APPENDIX D

PUENTE NARROWS WATERMASTER REPORT

April 18, 2024

Main San Gabriel Basin Watermaster
725 N. Azusa Avenue
Azusa, CA 91702

RE: Puente Narrows Underflow, Fiscal Year 2023-24

Ladies and Gentlemen:

Pursuant to the Judgment in Upper San Gabriel Valley Municipal Water District v. City of Alhambra, et al. and its Exhibit J, Puente Narrows Agreement, the subsurface flow passing from Puente Basin to the Main San Gabriel Basin was determined for fiscal year 2023-24. This determination of subsurface flow was made in accordance with Appendix C, Engineering Criteria, to Exhibit J of the Judgment and consisted of measuring the water levels at the two key wells.

The field measurements of the water levels at the upstream well, 2S/10W-9Q, and downstream well, 2S/10W-8E3, for Fall 2023 were collected on October 4, 2023 by Mr. Tuan Nguyen of Stetson Engineers Inc. representing Upper San Gabriel Valley Municipal Water District and Mr. Charlie Devine of Civiltec Engineering Inc. representing Puente Basin Water Agency. The field measurements of the water levels at the upstream well, 2S/10W-9Q, and downstream well, 2S/10W-8E3, for Spring 2024 were collected on April 11, 2024 by Mr. Tuan Nguyen of Stetson Engineers Inc. representing Upper San Gabriel Valley Municipal Water District and Mr. Charlie Devine of Civiltec Engineering Inc. representing Puente Basin Water Agency. Based on the Fall 2023 and Spring 2024 static water levels at the key wells, the subsurface flow was determined to be 895 acre-feet for fiscal year 2023-24, as shown on Table 1.

Field inspections of the concrete-lined San Jose Creek channel were made concurrently with the field water level measurements and indicated no apparent withdrawal of flow in the San Jose Creek channel from the boundary of Spadra Basin with Puente Basin and downstream to Puente Narrows.

The Puente Narrows Agreement requires that a perpetual accounting of the subsurface flow through Puente Narrows be maintained. Presented in Table 2 is the accounting to date, showing the Accumulated Base Underflow (at 580 acre-feet per year in accordance with Paragraph 8 of the Agreement), the Annual and Accumulated Subsurface Flow to date under the Agreement, the Accumulated Credit or Debit of Puente Agency and the Adjusted Accumulated Credit or Debit of Puente Agency (from Table 3).

By Agreement dated November 30, 1989, Puente Basin Water Agency and Upper San Gabriel Valley Municipal Water District agreed that groundwater extracted from Puente Basin that is treated and discharged to the lined channel, and then percolated in the Main Basin as part of Carrier Corporation's cleanup program, which is required by the Regional Water Quality Control Board, shall be credited to

Puente Agency as subsurface outflow from Puente Basin. Evaporation losses and unusable surface outflow to the ocean are deducted from such groundwater extraction from Puente Basin. As shown on Table 3, Column 6, since fiscal-year 2007-08, Carrier stopped discharging this treated water and the water is being beneficially used in the Puente Basin.

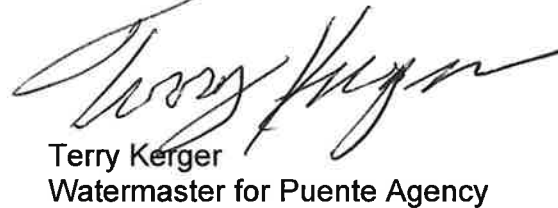

Table 3 shows the Groundwater Extraction for Cleanup Purposes, Deliveries to Rowland Water District, Discharge to Sanitary Sewer, Total Evaporation Losses, Unusable Outflow to Ocean, Annual Cleanup Extraction Credit, accumulated Annual Cleanup Extraction Credit, Accumulated Credit or Debit of Puente Agency (from Table 2), and the Adjusted Accumulated Credit or Debit of Puente Agency.

Respectfully Submitted,

PUENTE NARROWS WATERMASTER

*Agreement Re Determination of Impact of "Cleanup" Production by Carrier Corporation Upon "Subsurface Outflow" Under "Puente Narrows Agreement," November 30, 1989.
 Note: Fiscal year 2023-24 adjustment to subsurface flow was not made due to incomplete data. The adjustment will be included in the Spring 2025 measurements.

APPENDIX E

**ANNUAL IMPORTED WATER DELIVERIES
AND
CYCLIC STORAGE**

1/ Sum of Replenishment Water, Replacement Water Surface Delivery, USG-5 Exchange Replacement Direct Deliveries, M & I Water, Cyclic Storage Account Deliveries on pages D-2, D-3 and D-4, plus Deliveries to Cyclic Storage on Page D-5.

2/ Includes 12,300.70 acre-feet of Morris Dam Water in 1977-78 and 24,000.00 acre-feet in 1978-79.

3/ Includes 12,756.00 acre-feet of RDA water and 14,384.31 acre-feet of Puente Basin Water Agency stored water.

4/ Includes 12,756.00 acre-feet of RDA water and 12,158.36 acre-feet of Puente Basin Water Agency stored water.

5/ Includes 12,756.00 acre-feet of RDA water and 10,677.32 acre-feet of Puente Basin Water Agency stored water.

6/ Includes 12,756.00 acre-feet of RDA water and 9,565.68 acre-feet of Puente Basin Water Agency stored water.

7/ Includes 12,756.00 acre-feet of RDA water and 9,060.80 acre-feet of Puente Basin Water Agency stored water.

8/ Includes 12,756.00 acre-feet of RDA water and 21,066.32 acre-feet of Puente Basin Water Agency stored water.

9/ Includes 12,756.00 acre-feet of RDA water and 20,876.43 acre-feet of Puente Basin Water Agency stored water.

10/ Includes 12,756.00 acre-feet of RDA water and 20,416.77 acre-feet of Puente Basin Water Agency stored water.

Note: The minimum and maximum values are bolded.

1/ Delivered as Replacement Water by Upper San Gabriel Valley Municipal Water District

2/ Includes 12,300.70 acre-feet of Morris Dam water in 1977-78 and 24,000.00 acre-feet in 1978-79

3/ Includes 1,002.40 acre-feet of In-Lieu Replenishment Water

4/ Actual delivery of 3,214.00 reduced by 735.90 acre-feet which was transferred to Producer Cyclic Storage Deliveries

5/ Includes transfer of 15,000 acre-feet from Three Valleys Cyclic Storage Account

6/ Actual delivery of 3,224.10 reduced by 10.10 acre-feet which was transferred to Producer Cyclic Storage Deliveries

7/ Includes direct deliveries to Azusa Valley Water Company of 2,290 AF through San Gabriel District's pipeline

8/ Transfer of 5,000 acre-feet from San Gabriel District's Cyclic Storage Account to Upper District/MWD's Cyclic Storage Account

1/ Includes 735.90 acre-feet transferred from USG-5 Exchange Replacement.

2/ Includes 10.10 acre-feet transferred from USG-5 Exchange Replacement.

3/ Delivered by San Gabriel Valley District on behalf of Upper District and Three Valleys District producers.

4/ Upper District delivered 1,931.00 AF on behalf of Three Valleys District producers and 1,517.37 AF on behalf of San Gabriel District producers.

5/ San Gabriel District delivered 98.24 AF on behalf of Three Valley District producers.

6/ Includes 11,689.30 acre-feet delivered by Three Valleys District on behalf of Upper District producers

7/ Upper District Producer pre-ordered 2,676 acre-feet of Cyclic Storage from Upper District. Pre-order applied to calculated 2013-14 Replacement Water Obligation.

8/ San Gabriel District Producer pre-ordered 4,500 acre-feet of Cyclic Storage from San Gabriel District. Pre-order applied to calculated 2013-14 Replacement Water Obligation.

9/ Transferred from City of Sierra Madre Cyclic Storage to San Gabriel District Cyclic Storage.

10/ Includes CSA credit.

11/ Pre-purchases by Producers of 890 AF was applied in FY 21-22, but will be deducted in UD/MWD Cyclic Storage account in FY 22-23.

Note: The minimum and maximum values are bolded.

1/ Assessments and interest rates apply to production during fiscal year indicated.

2/ The Administration Assessment is uniformly applied to each acre-foot of production and is used to fund the Administration Budget shown in Appendix Q.

3/ The Special Administration Assessment is uniformly applied to each acre-foot of production and is used to fund costs associated with Main San Gabriel Basin cleanup activities.

4/ The Make-up Water Assessment is applied to each acre-foot of production that does not bear a Replacement Water Assessment. The Assessment is not applicable to production for an Overlying Right. It is used to fund the Administration costs and Make-up Water Obligation under the Long Beach Judgment.

5/ The In-lieu Assessment is applied to each acre-foot of production, except the non-consumptive use portion of an Overlying Right, and is used to fund the differential cost of Supplemental Water for producers to take delivery of Supplemental Water as requested by Watermaster.

6/ The Water Resource Development Assessment is uniformly applied to each acre-foot of production and is used to fund costs associated with the purchase and delivery of untreated imported water to supplement stormwater replenishment.

7/ The Replacement Water Assessment is applied on production in excess of a production right and is used to purchase Supplemental Water from the appropriate Responsible Agency.

8/ Upper San Gabriel Valley Municipal Water District.

9/ San Gabriel Valley Municipal Water District. Assessed Production Year.

10/ Three Valleys Municipal Water District.

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of Main San Gabriel Basin Watermaster (Watermaster), which comprise the balance sheets as of June 30, 2024 and 2023, and the related statements of revenue, expenses, and changes in net assets, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Watermaster, as of June 30, 2024 and 2023, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Watermaster and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Watermaster ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Watermaster's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Watermaster's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Supplementary Information

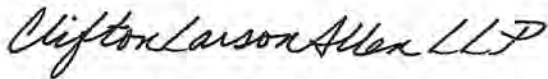

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The schedules of revenues, expenses, and changes in net assets by fund is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Board of Directors
Main San Gabriel Basin Watermaster

Other Information Included in the Annual Report

Management is responsible for the other information included in the annual report. The other information comprises the Management's Discussion and Analysis but does not include the financial statements and our auditors' report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

September 23, 2024

Background

The Main San Gabriel Basin Watermaster (Watermaster) was created by the Los Angeles Superior Court through a stipulated judgment (LASC Case 924128) to administer water rights and manage the Main San Gabriel Groundwater Basin. The Judgment prescribes Watermaster's authorities and specifies five classes of water production assessments to be used to fund certain activities. Those assessment categories are: Administrative, Replacement Water, Make-up Water, In-Lieu, and Water Resource Development Assessment. Each class of assessment has a prescribed purpose and water production base. Assessment revenue is Watermaster's principal source of income.

Watermaster's Administrative Fund includes funds for administrative expenses as budgeted each year.

The Replacement Water Fund is an assessment collected to purchase imported water to cover any production in excess of production rights, as established with the Annual Operating Safe Yield.

The Make-up Obligation Fund is money collected to purchase Make-up Water for the Lower Area (Central Basin) as part of the Long Beach Judgment. This assessment is reviewed annually and has been suspended since FY 1996-97 production due to a water accounting credit. These funds are held in anticipation of a potential future obligation to the Lower Area.

Watermaster's In-Lieu Assessment covers the cost of the Alhambra Exchange as well as the Direct Delivery Imported Water Program that was implemented in 2014-15, though not utilized in FY 2023-24. The Program was intended to shift an agency's groundwater production to a treated Metropolitan Water District connection to supply system demand in times of drought and consequently helping to keep groundwater levels from additional decline. This also includes Ready-to-Serve Charges, and the Capacity Charge within the Replacement Water Fund under the In-Lieu subheading.

During FY 2013-14, Watermaster adopted Resolution No. 09-13-257 declaring its intention to create a Water Resource Development Assessment (RDA) as a source of funding to pre-purchase water for basin storage and reliability. On May 14, 2014, the Board adopted Resolution No. 05-14-263 establishing the RDA for implementation on all FY 2014-15 production, with an accounting of each Producer's contribution.

During FY 2015-16, Watermaster developed a Stormwater Augmentation Program to help manage Basin water supplies under severe drought conditions. Through this, the Board revised Watermaster's Water Resource Development Assessment Policy to provide a funding source for water purchases for general, Basin-wide benefit, referred to as the RDA II. In early 2017, after significant rainfall and run-off in Northern California, MWD approached Watermaster with an opportunity to purchase excess supplies from the State Water Project. The Executive Officer and Watermaster Board negotiated a cyclic delivery to MWD's existing account in the Basin, with a five-year payment plan, based on the RDA II assessment policy criteria. The same arrangement for an additional delivery was also approved by the Watermaster Board and MWD in early 2019. Funds from the RDA provided the mechanism to commit to this purchase of available supplemental water supplies.

On May 2, 2023, the Watermaster Board adopted Resolution No. 05-23-315 setting FY 2022-23 assessment rates, including RDA, on all water produced during FY 2022-23. RDA II includes a ramping schedule to fund the purchase of MWD's cyclic deliveries.

Summary of Financial Information

For the year ending June 30, 2024, Watermaster's Total Assets decreased by 25% to \$53 million, including a decrease of 21% in Net Assets to \$50 million. The Administrative Fund had a net increase of \$63,000 primarily due to an increase in LAIF Interest Income, as well as the one-time board approved Make-up Interest transfer to cover the Administrative Assessment Shortfall due to the lower production, and the overlap of the new Executive Officer and Senior Accountant. The Replacement Fund had a net decrease of \$13.4 million mainly due to the RDA Water Purchases, which included additional RDA water purchased with RDA Funds received in the prior year that were retained until additional water was available. Also, this fund included \$1.6 million in LAIF Interest Earned. The Make-Up Obligation Fund had a net increase of \$161,474 since the LAIF rates increased during this fiscal year; therefore, the revenue was more than the San Gabriel River Watermaster Expense.

Current liabilities include accounts payable of \$1.4 million in the Replacement Fund of which \$822,000 was for SGVMWD Replacement Water Obligation for FY 2022-2023, and \$252,000 for a producer Cyclic Storage Order, which both were paid in the summer of 2024.

Noncurrent liabilities increased by \$15,491 for Other Postemployment Benefits (OPEB) compared to an increase of \$15,108 in the prior year due to the update of the discount rate. Watermaster's Actuarial Valuation is done every two years, which includes the following year's projections and helps minimize larger adjustments each year. Currently, Watermaster funds retiree health benefits on a pay-as-you-go basis by previously withholding a portion of annual employee salary Cost of Living Adjustments (COLA). In FY 2023-24, the Board approved the COLA for employees without additional deduction but maintained the existing 7%. These funds are set aside for the payment of current and future retiree health benefits. Currently, the market value of assets set aside for this purpose, as of June 30, 2024, is greater than the projected Accumulated Postretirement Benefit Obligation on June 30, 2024, by \$348,851.

Review of Revenues and Expenses

The Administrative Assessment revenue decreased from the prior year by \$131,000 due to lower production (167,816.23 AF assessed in FY 2023-24 for water produced in 2022-23 vs. 185,296.56 AF assessed in FY 2022-23 for water produced in 2021-22), with the assessment increased from \$17 to \$18 per acre-foot. The increase in Engineering Fees from the previous year was \$19,400, for Water Quality Monitoring expenses was \$7,000, and for Administrative and General expenses was \$356,000, primarily due to Salaries and Benefits offset by the one-time Make-Up Fund Interest Transfer. A decrease to Water Quality Management expenses by \$47,000, with fewer Section 28 Staff Reports.

Operating revenues in the Replacement Water Fund decreased by \$5 million primarily due to the decrease in overall production, in part due to conservation efforts, for Replacement Obligation and RDA. In FY 2023-24, Cyclic Storage Water purchases decreased by \$15 million from the prior year. Also, in FY 2023-24, overall Water Purchases increased by \$33 million due to water not being available until 2023 calendar year-end using funds collected in 2023 and 2022.

The In-Lieu Assessment revenue decreased by \$141,000, also due to lower production, while the assessment remained at \$8 per acre-foot. This assessment covers the Direct Delivery In-Lieu Water Purchases Program (though not utilized this fiscal year), the Alhambra Exchange Agreement (AEA), the Ready-to-Serve Charge, and the Metropolitan Water District Capacity Charge assessed for taking treated imported water during peak demand.

Comparison of FY 2023-24 Administration Budget to Actual Revenues and Expenses

Administrative Assessment revenue came in lower than the budgeted amount due to production being lower than budgeted. Other Income and Reimbursements, which includes BPOU Reimbursements for Labor and Overhead, came in lower than Budget by about \$4,000. Interest Income was budgeted conservatively, but then in the current year the rates continued to increase by about 1.5%. Interest Income was budgeted at \$40,000, and actual was \$143,000, also included in Interest Income this year is a one-time transfer from the Make-Up Fund Interest of \$219,308 to cover the Administrative Assessment Shortfall due to the lower production, and \$89,200 to cover the overlap of the new Executive Officer and Senior Accountant.

Overall, Engineering and related expenses came in lower than budget by approximately 25%. These savings include the Ad Hoc Committee Meetings by \$8,000, Database Management costs for LDC came in about \$6,000 under budget. Also, there were some savings under Engineering Federal/State Work for PVOU & EMOU by \$10,500 combined. Other specific items budgeted and unused this fiscal year include \$40,000 for MWD Carson Recycled Water Project, and \$10,000 for San Gabriel Canyon Studies/Management. Additionally, savings were seen in WQ Monitoring primarily due to PFAS Lab & Sampling costs, UCMR Lab Costs, and Title 22 Lab Costs. Under WQ Management, Section 28 Staff Reports came in about \$28,000 lower than budgeted. Other savings included \$11,000 for the Groundwater Monitoring Network, and \$10,000 of unused Quagga Mussel Plan Budget.

Legal expenses for the year were budgeted to include Quagga Mussel Management Plan and concerns regarding environmental and habitat designations that could potentially impact water rights in the Main Basin. In total, legal expenses for fiscal year 2023-24 were 62% lower than budgeted.

Under Administrative costs, areas of higher than budgeted expenditures include Accounting and Auditing, Computer/Office Equipment, Depreciation, and Insurance Expense. For the Audit Expense, there was a 15% increase due to inflation. Depreciation Expense is not a budgeted item since it only reduces the fixed assets and it's not a cash related expense. The new Executive Officer's laptop and docking station were not included in the Computer Expense Budget when approved in the prior year. The insurance expense included an increase to the Liability Coverage (D&O/Pollution) which was offset by savings to the Cyber Liability Program.

Budget savings in Administrative costs were seen in several areas. Watermaster Compensation was \$12,500 lower than budget, which is conservatively estimated to cover ACWA Conferences and ad hoc meetings. The building lease O&M costs had a savings of \$17,000, and office supplies at \$13,000. Office Improvements shows an unused budget of \$6,000, but together with savings under Office Equipment, which includes Office Furniture, as well as other cost savings, covered the Administration Manager's Office Furniture, which posted to Fixed Assets. Also, this year we used only 5% of the Employee Education Reimbursements budget, and 20% of the Employee Training Costs since most of our training was done through our insurance provider utilizing a benefit called Target Solutions, at no additional cost. The contingency line item of \$45,660 was left unused for FY 2023-24.

The financial report contained herein is designed to provide a general overview of the finances, activities, and operations of the Watermaster. To obtain additional information, please feel free to contact the Main San Gabriel Basin Watermaster at 626-815-1300.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Activities

In a judgment dated January 4, 1973, in the Superior Court of the State of California for the County of Los Angeles, the court established the Main San Gabriel Basin Watermaster (Watermaster), which administers the judgment. One of the functions of Watermaster is to levy and collect funds to pay the city of Long Beach, the city of Compton, and the Central Basin Municipal Water District for make-up water to replace water used in the San Gabriel Basin which the lower area maintained was properly theirs. The payments have been made for several years through the Upper San Gabriel Valley Municipal Water District as a result of a negotiated agreement in 1965 and reaffirmed by a validation suit in the same year. The collections and disbursements of this fund are accounted for in the Make-Up Obligation Fund.

Watermaster also levies and collects funds to purchase replacement water for Basin overproduction. These collections and disbursements are accounted for in the Replacement Water Fund.

All financial transactions, other than those which fall within the Make-Up Obligation Fund or Replacement Water Fund, are recorded in the Administrative Fund. Assessments are made annually.

Watermaster proposed amendments to its judgment to provide greater flexibility in carrying out its purpose. The judgment amendment was approved by the court on June 21, 2012.

Basis of Accounting and Financial Statement Presentation

The accompanying financial statements have been prepared on the accrual method of accounting in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

Classification of Net Assets

Watermaster classifies its net assets based upon the existence or absence of donor or grantor-imposed restrictions. Accordingly, net assets and the changes therein are classified and reported as follows:

Net Assets Without Donor Restrictions – Net assets available for use in general operations and not subject to donor restrictions.

Net Assets With Donor Restrictions – Net assets subject to donor-imposed restrictions which may be temporary in nature and met by the passage of time or other events specified by the donor. Other donor-imposed restrictions may stipulate that the resources be maintained in perpetuity.

As of June 30, 2024 and 2023, respectively, the Watermaster had no net assets with donor imposed restrictions. As such, total net assets have been reported without restrictions.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Cash and Cash Equivalents

Cash and cash equivalents consist primarily of short-term investments which have a maturity of ninety days or less. At June 30, 2024 and 2023, Watermaster invested with the State Treasurer's Local Agency Investment Fund. This is a pooled money investment account and is carried at amortized cost with no restrictions on access to funds and, therefore, is considered a cash equivalent.

Cash and cash equivalents at June 30, 2024 and 2023 include \$795,031 and \$697,680, respectively, that the board has designated for future other postretirement benefit obligations.

Accounts Receivable and Allowance for Credit Losses

All receivables represent amounts due from various vendors for services provided. Account Receivables are reported at the amount expected to be collected. The organization evaluates expected credit losses on an ongoing basis using historical payment trends, write off experience and aging receivables, and a review of specific accounts and adjustments are made as necessary. Receivables are written off after all reasonable collection efforts have been exhausted and are recognized as bad debt under the direct write off method uncollectible. Management believes no allowance for expected credit loss estimate is considered necessary based on historical credit losses and estimated future credit losses.

Due from BPOU Committee

Watermaster, along with six other water agencies, entered an agreement for groundwater cleanup in the Baldwin Park Operable Unit (BPOU). Under the agreement, responsible parties agreed to pay toward research, cost recovery, treatment plant construction and operating expenses in the cleanup effort. Watermaster bills the responsible parties and collects the funds. Due from BPOU committee receivable is considered fully collectible. The agreement specifies that if the responsible parties fail to make the required payment, Watermaster is entitled to be reimbursed by the Trustee.

Capital Assets

Capital assets are recorded at cost and Watermaster's capitalization threshold is \$5,000. Furniture and equipment are being depreciated on the straight-line method over estimated useful lives ranging from 3 to 10 years. Depreciation expense for the years ended June 30, 2024 and 2023 was \$6,650 and \$2,447, respectively.

Income Taxes

On July 31, 1981, Watermaster received a ruling from the Internal Revenue Service (IRS) exempting it from federal income taxes. A similar ruling was received from the California State Franchise Tax Board (CA FTB) on October 16, 1981. As such, the Watermaster is not required to file tax returns to the IRS or the CA FTB.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Classification of Revenue and Recognition

Operating revenues are earned by levying and collecting assessments from the producers based upon their amounts of production during the preceding fiscal year. These assessments are applied primarily to the purchase of replacement water and to administrative costs. Water production assessments include Administrative, In-Lieu, Make-Up Water, Replacement, and Water Resource Development. Assessments are billed on a yearly basis. Annual assessments are recognized as revenue in the period when the annual assessments are levied, based upon preceding fiscal year production. Nonoperating revenues are those derived primarily from investment income.

Use of Estimates

In preparing financial statements in conformity with U.S. GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. Actual results could differ from those estimates.

Adoption of New Accounting Standards

In June 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2016-13, *Credit Losses (Topic 326)*. This new standard modifies the measurement of expected credit losses. The Watermaster adopted this new guidance beginning July 1 2024 and utilizing the modified retrospective transition method. The adoption of this standard did not have a material impact on the Watermaster's financial statements.

NOTE 2 CASH DEPOSITS AND INVESTMENTS

Custodial Risk

Custodial credit risk is the risk that in the event of a bank failure, Watermaster's deposits may not be returned to it. Watermaster does not have a deposit policy for custodial credit risk. Deposits in financial institutions, reported as components of cash, were fully insured by depository insurance or secured by collateral held by the pledging financial institutions and trust department in Watermaster's name.

Investment Interest Rate Risk

Watermaster has an investment policy that limits investment maturities to no more than five years as a means of managing its exposure to fair value losses arising from increasing interest rates.

NOTE 2 CASH DEPOSITS AND INVESTMENTS (CONTINUED)

Investment Credit Risk

Watermaster's formal investment policy limits its investment choices to the following:

1. Local Agency Investment Fund (LAIF)
2. U.S. Treasury and agency obligations
3. Fully insured certificates of deposit
4. Investment in local water quality and supply projects, associated with Basin cleanup objectives, through the borrowing of funds from the Make-Up Water Fund.

Concentration of Investment Credit Risk

Watermaster's formal investment policy limits any one type of investment to no more than 25% of the total portfolio, except for LAIF or U.S. Treasury and agency obligations.

NOTE 3 EQUIPMENT AND LEASEHOLD IMPROVEMENTS

Equipment and leasehold improvements consisted of the following at June 30:

	2024	2023
Furniture and Equipment	\$ 229,509	\$ 215,176
Leasehold Improvements	25,958	25,958
Total	255,467	241,134
Less Accumulated Depreciation	(215,216)	(208,566)
Equipment and Leasehold Improvements, Net	\$ 40,251	\$ 32,568

NOTE 4 LEASES

Watermaster leases office space from the city of Azusa under a year-to-year lease agreement which may be canceled by the Watermaster or the City of Azusa at any time with a 30-day notice. In addition to the monthly rental amount, Watermaster is required to pay a percentage of management and operating expenses. Watermaster also leases certain equipment under noncancelable leases. The Company has elected to recognize payments for short-term leases with a lease term of 12 months or less as expense as incurred and these leases are not included as lease liabilities or right of use assets on the balance sheet.

NOTE 5 PENSION PLAN

Plan Description and Provisions

Qualified employees are eligible to participate in the Public Agency Cost-Sharing Multiple-Employer Plan under the California Public Employees' Retirement System plan (CalPERS), a cost-sharing multiple-employer defined benefit pension plan administered by CalPERS. The Public Agency Cost-Sharing Multiple-Employer Plan is comprised of a Miscellaneous Pool and a Safety Pool. Watermaster sponsors two Miscellaneous Risk Pool plans, however, the information presented below represents the sum of the allocated pension amounts for each of Watermaster's plans (the Plan). The Plan provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to Plan members and their beneficiaries. Benefit provisions are established by state statutes, as legislatively amended, within the Public Employees' Retirement Law. Copies of CalPERS' annual financial report may be obtained from their executive office: 400 P Street, Sacramento, CA 95814.

Funding Policy and Annual Pension Cost

The Public Employees' Pension Reform Act of 2013 (PEPRA) introduced a new class of Members (PEPRA Members) and defined different assumptions and benefits for these PEPRA Members than those used for continuing members (Classic Members). Classic Members are required to contribute 7% of their annual covered salary and PEPRA Members are required to contribute 7.75% of their annual covered salary. Watermaster makes the contributions required of the Classic Members on their behalf and for their account but does not make the contributions required of the PEPRA Members. Watermaster is required to contribute annually at actuarially determined rates; the current rates are 12.47% and 7.68% of annual covered payroll for Classic Members and PEPRA Members, respectively.

Funding Policy and Annual Pension Cost (Continued)

The contribution requirements of plan members and Watermaster are established and may be amended by CalPERS. For fiscal year ended June 30, 2024, Watermaster's annual pension cost of \$350,843 for CalPERS was equal to Watermaster's required and actual contributions.

Funded Status

The following information summarizes the funded status of the CalPERS Plan as of June 30, 2023 measurement date, the most recent actuarial valuation date available:

	Plan-Wide Information (In Thousands)
Total Pension Liability	\$ 52,441,984
Less: Plan Fiduciary Net Position	39,966,633
Plan Net Pension Liability	<u>\$ 12,475,351</u>
Funded Ratio	76.21%

NOTE 6 POSTRETIREMENT HEALTH BENEFIT PLAN

Watermaster provides medical coverage to eight active employees and one retired employee through the Association of California Water Agencies/Joint Powers Insurance Authority (ACWA/JPIA) Health Program. At retirement, Watermaster provides a contribution for the continuation of medical coverage for eligible retirees. For employees hired prior to January 1, 2013, eligibility for a Watermaster contribution requires retirement from Watermaster under PERS on or after age 55 with at least 10 years of full-time service. For employees hired after January 1, 2013, and new to PERS, eligibility for a Watermaster contribution requires retirement from Watermaster under PERS on or after age 62 with at least 10 years of full-time service. Watermaster provides for a contribution equal to a 100% of the cost of medical coverage for the retiree if electing retiree only coverage and 50% of the cost of medical coverage if electing coverage for the retiree and eligible dependents. Benefits are payable until the retiree’s attained age of 65.

Watermaster currently finances benefits on a pay as you go basis. Although the plan has no segregated assets, Watermaster does maintain funds in LAIF that are designated for retiree health care costs. At June 30, 2024, the fund’s designated balance was \$795,031.

The following tables set forth further information about Watermaster’s postretirement benefit plan:

	<u>2024</u>	<u>2023</u>
Plan Obligations and Funded Status:		
Projected Benefit Obligation at June 30	\$ 446,180	\$ 430,689

Total Amount Recognized in the Statement of Revenues, Expenses, and Changes in Net Assets	 <u>\$ 29,818</u>	 <u>\$ 29,983</u>

Other changes in plan assets and benefit obligations previously recognized in changes in net assets without restriction:

	<u>2024</u>	<u>2023</u>
Actuarial Loss	<u>\$ (81,271)</u>	<u>\$ (75,750)</u>
Amounts Previously Recognized in Unrestricted Net Assets, not yet Recognized as Periodic Benefit Cost at June 30	 <u>\$ (81,271)</u>	 <u>\$ (75,750)</u>

Weighted-average assumption used to determine benefit obligations as of June 30:

	<u>2024</u>	<u>2023</u>
Discount Rate	2.41%	2.41%
Expected Long-Term Return on Plan Assets	N/A	N/A
Rate of Compensation	N/A	N/A
 Health Care Cost Trend Rate Assumed for Next Year Rate to Which the Cost Trend Rate is Assumed to Decline (the Ultimate Rate)	 6.75%/6.25%	 7%/6.5%
Year that the Rate Reaches the Ultimate Trend Rate	4.50%	4.50%
	9/7 Years	8+ Years

NOTE 6 POSTRETIREMENT HEALTH BENEFIT PLAN (CONTINUED)

Watermaster expects to contribute \$26,257 to the plan during the next fiscal year ended June 30, 2025. The following is a projection of expected future benefit payments under the plan:

<u>Year Ending June 30,</u>	<u>Amount</u>
2025	\$ 26,257
2026	33,196
2027	10,149
2028	13,720
2029	20,980
Thereafter	158,019
Total	<u>\$ 262,321</u>

NOTE 7 WATER RESOURCE DEVELOPMENT ASSESSMENT

Pursuant to the June 21, 2012 judgment, Watermaster has adopted Resolution No. 05-14-263 which established a Water Resource Development Assessment (RDA I) on all water produced from the Basin. This assessment is intended to aid Watermaster in the purchase and storage of 100,000 acre-feet of supplemental water to address potential future replacement water obligations in the event supplemental water supplies are interrupted in the future. The RDA will be evaluated annually and assessed over a 10-year period ending with the 2023-24 fiscal year production. Water stored under this program can be used only by action from the board under one or more of the following conditions: Watermaster's inability to deliver at least 50% of basin replacement Water for two consecutive years; damage to State Water Project or Colorado River aqueduct facilities; the implementation of a drought allocation penalty rate for the purchase of replacement water. Water stored under this program will not have any influence on the determination of the annual operating safe yield. With implementation of RDA II, RDA I was paused, but reviewed annually.

During FY 2015-16, Watermaster developed a Stormwater Augmentation Program to help manage Basin water supplies under severe drought conditions. Through this, the board revised Watermaster's Water Resource Development Assessment Policy to provide a funding source for water purchases for general, Basin-wide benefit, referred to as the RDA II. RDA II established a 5-year ramping assessment from \$40/AF to \$175/AF on all water produced in the Basin. Like RDA I, the Watermaster board will review annually to determine need. In early 2017, after significant rainfall and run-off in Northern California, MWD approached Watermaster with an opportunity to purchase excess supplies from the State Water Project. The Executive Officer and Watermaster board negotiated a cyclic delivery to MWD's existing account in the Basin, with a five-year payment plan, based on the RDA II assessment policy criteria.

The RDA I and RDA II are part of a single program. The RDA II program was an expansion of the RDA implemented for general benefit water while considering financial tolerances of rate payors. As of June 30, 2018, all funds collected through the RDA program to purchase water fall under the RDA II facet.

NOTE 8 DIRECT DELIVERY IMPORTED WATER PROGRAM

As a result of declining basin water levels and the prolonged drought, Watermaster established a Direct-Delivery Imported Water Program effective January 1, 2015. Through this program participating agencies will shift their demand from groundwater production to direct delivery of treated imported water. Watermaster is obligated to reimburse participating agencies for these purchases up to amounts designated by board approval.

Watermaster began levy and collection of assessments to offset this production in fiscal year 2015-16 included in the annual In-Lieu assessment.

NOTE 9 SUBSEQUENT EVENTS

Management evaluated subsequent events through September 23, 2024, the date the financial statements were available to be issued.
